1 VIDEOGRAPHER: We are now on
2 the record.

3 My name is Robert Sweig, and I
4 am a videographer representing Golkow
5 Litigation Services.

6 Today's date is June 13, 2019,
7 and the time is 9:04 a.m.

8 This video deposition is being
9 held in Boston, Massachusetts, in the
10 matter of In Re: National Prescription
11 Opiate Litigation, pending before the
12 United States District Court for the
13 Northern District of Ohio, Eastern
14 Division.

15 Our deponent is Gerard Hevern,
16 MD.

17 Would counsel attending locally
18 please identify yourselves for the
19 record?

20 MS. GAFFNEY: Alison Gaffney
21 from Keller Rohrbach for the
22 plaintiffs.

23 MR. KAWAMOTO: Dean Kawamoto,
24 Keller Rohrbach, for the plaintiffs.

25 MR. BLANK: Tim Blank with

1 Dechert for defendant Purdue.

2 MS. HADAGHIAN: Negin Hadaghian
3 from Dechert, also for defendant
4 Purdue.

5 VIDEOGRAPHER: Thank you.

6 And would counsel attending via
7 teleconference please identify
8 yourselves for the record?

9 MR. MURPHY: Matthew Murphy
10 from O'Melveny & Myers on behalf of
11 Johnson & Johnson and Janssen.

12 MR. WEST: Robert West on
13 behalf of Discount Drug Mart.

14 VIDEOGRAPHER: All right.
15 Thank you.

16 Our court reporter is Carrie
17 Campbell, and she will now swear in
18 our witness.

19
20 GERARD HEVERN, M.D.,
21 of lawful age, having been first duly sworn
22 to tell the truth, the whole truth and
23 nothing but the truth, deposes and says on
24 behalf of the Plaintiffs, as follows:
25

1 DIRECT EXAMINATION

2 QUESTIONS BY MS. GAFFNEY:

3 Q. Good morning, Dr. Hevern.

4 Could you please state and
5 spell your full name for the record?

6 A. Sure. My name is Gerard
7 Hevern, G-e-r-a-r-d, last name Hevern,
8 H-e-v-e-r-n.

9 Q. Thank you.

10 Have you ever been known by any
11 other names?

12 A. Jerry, J-e-r-r-y.

13 Q. Thank you.

14 Dr. Hevern, you understand
15 you're under oath today, right?

16 A. I do.

17 Q. Is there any reason that you
18 would be unable to give your full, complete
19 and honest testimony today?

20 A. No.

21 Q. Not on any medication that
22 would interfere with your ability to testify
23 today?

24 A. I'm not.

25 Q. Okay. Have you ever testified

1 in a deposition or trial or legal proceeding
2 before?

3 A. Yes, I have.

4 Q. Okay. And we'll go back to
5 that later, but so I presume you're familiar
6 with the ground rules of depositions.
7 There's just a few I'd like to go over.

8 First is that we not speak over
9 each other for the sake of the record, the
10 court reporter, so please wait for me to
11 finish asking a question before you answer,
12 and I will wait for you to finish answering
13 before I ask another question.

14 Second is that when you answer
15 a question, please answer it verbally, not
16 nodding or shaking the head.

17 And then last, if I ask a
18 question that you don't understand, just let
19 me know and I will try to rephrase it.

20 Sound good?

21 A. Sounds fine.

22 (Hevern Exhibit 1 marked for
23 identification.)

24 QUESTIONS BY MS. GAFFNEY:

25 Q. Okay. Great.

1 I would like to mark as
2 Exhibit 1 the notice of deposition.

3 A. Do I hand this back to you
4 or --

5 Q. No, that's your copy.
6 Have you seen this document
7 before?

8 A. I have.

9 Q. Okay. And you've reviewed this
10 notice, I take it?

11 A. I have.

12 Q. Okay. Did you bring any
13 materials with you to the deposition today?

14 A. No, I have not.

15 Q. Okay. Dr. Hevern, you said you
16 have testified before.

17 What was the context in which
18 you testified before?

19 A. In a number of malpractice
20 cases.

21 Q. Okay. And did you testify as
22 an expert witness or as a party to the
23 litigation or both?

24 A. Party to -- excuse me, party to
25 the litigation.

1 Q. Okay. Have you ever been
2 engaged as an expert in litigation before?

3 A. No.

4 Q. Okay. Have you ever advertised
5 your services as an expert?

6 A. No.

7 Q. Are there any cases where even
8 if you didn't testify as an expert you
9 evaluated the case materials or prepared a
10 report?

11 A. On two occasions.

12 Q. Okay. And what were those
13 occasions?

14 A. One was reviewing a case in
15 Boston here for a lawyer who was defending a
16 physician who had died, concerning a man who
17 had overdosed on methadone.

18 Q. Okay.

19 A. And the second case was
20 reviewing a case for a man from Vermont who
21 had -- was an alcoholic, and there was a
22 change in his will following his discharge
23 from the hospital.

24 Q. Okay. With the case that was
25 here in Boston, when was that?

1 A. I don't remember explicitly,
2 but I would say in the last eight years.

3 Q. Okay. Did you prepare a
4 written report for that?

5 A. No.

6 Q. Okay. And how about the second
7 case, the man from Vermont, when did that
8 occur?

9 A. Probably in the early 2000s.

10 Q. Okay. And are those the only
11 two instances in which you have provided
12 expert services to litigation prior to your
13 engagement with this case?

14 A. Correct.

15 Q. Okay. And in the cases in
16 which you were a party to litigation, how
17 many cases are we talking about?

18 A. Seven.

19 Q. Seven.

20 Okay. When was the earliest of
21 those?

22 A. In the 1980s.

23 Q. 1980s.

24 Okay. And when was the most
25 recent?

1 A. Probably in the late '90s or
2 early 2000s.

3 Q. How did these seven cases
4 resolve?

5 A. Two of them I was removed from.
6 I don't know what the word would be used,
7 legal, but I never went to court, and they
8 dropped my name from the legal suit, so
9 whatever that is.

10 Two of them went to court and
11 it was a verdict on my behalf, positive.

12 And three of them were settled
13 out of court.

14 Q. Were all of these in the same
15 venue, in the same geographic location?

16 A. They were all in New Hampshire.

17 Q. Of the three that settled, when
18 did those take place?

19 A. In the late '90s maybe, early
20 2000s. I don't specifically recall.

21 Q. And all of these were med mal
22 cases?

23 A. Correct.

24 Q. Okay. What was the nature of
25 the allegations -- I know we're talking about

1 seven different cases here, but were they all
2 relating to the same type of treatment or a
3 variety of treatment?

4 A. Almost all different varieties.

5 Q. Okay. Could you describe them
6 for me?

7 A. Which ones? I don't --

8 Q. Start from the beginning.

9 A. The two that were dismissed
10 was -- I was on -- was a -- an inmate in a
11 jail that I was on call for and there was an
12 accusation that I delayed treatment. And
13 after deposition, that was found -- I was
14 dismissed.

15 The second one was a woman who
16 had a septic emboli and died of a
17 intracranial bleed on a weekend that I was
18 not on call, and that was dismissed.

19 The two cases that I won was --
20 one was a case in which the -- a man who had
21 been hospitalized at the Riverway Center for
22 Recovery for alcoholism signed himself out
23 against medical advice on a weekend that I
24 was not on call and within a number of hours
25 hung himself.

1 Let's see. The next case was a
2 woman who presented with premature labor. I
3 was not her treating obstetrician. I
4 transferred her to an obstetrician who then
5 transferred her down to Boston and the baby
6 was born, and there was an accusation that I
7 didn't effectively manage that. And so the
8 child was born with some delays but did fine,
9 you know, is ultimately alive and well now.

10 The cases that were -- that
11 were settled out of court was -- again, I was
12 on call for an obstetrical case. They -- the
13 accusation was is that there was a delay in
14 doing a cesarean section for a baby in
15 distress. I was named in the suit, I was
16 never deposed, and it was settled out of
17 court.

18 The next case was I was on call
19 for a -- you know, one of the people that I
20 was on call for. A woman called on a call
21 and had some chest pain that had previously
22 been worked up. I recommended that she go to
23 the emergency room. She delayed in going for
24 24 hours, and she developed a compression of
25 her thoracic vertebrae and became paraplegic.

1 So that -- that -- I was deposed on that, and
2 that settled out of court.

3 And the last and final case was
4 a case of mine in which a man who had rectal
5 bleeding, who I recommended a colonoscopy, he
6 declined. He had a sigmoidoscopy, which was
7 negative, and subsequently died of colon
8 cancer.

9 Q. Thank you for going through
10 that.

11 So just reviewing what you just
12 explained of these cases which you were a
13 party to and then the two that you consulted
14 on as an expert, it sounds like only one of
15 them was related to opioids; is that correct?
16 The methadone overdose case?

17 A. Correct.

18 Q. And what was the -- and you
19 testified that you didn't provide a written
20 report; you just evaluated the case?

21 A. Correct.

22 Q. Okay. Other than these
23 litigation contexts, have you ever testified
24 in a different capacity, for example, before
25 Congress or before a federal agency?

1 A. No.

2 Q. So how did your participation
3 in this case come about?

4 A. I received a phone call from
5 Dechert.

6 Q. Had you ever worked with
7 Dechert previously?

8 A. No.

9 Q. Were you surprised to get that
10 call?

11 MR. BLANK: Objection.

12 THE WITNESS: Yes.

13 QUESTIONS BY MS. GAFFNEY:

14 Q. And why were you surprised?

15 MR. BLANK: Objection.

16 THE WITNESS: I didn't know who
17 Dechert was. I didn't have any idea
18 of what was -- why my name might have
19 been selected.

20 QUESTIONS BY MS. GAFFNEY:

21 Q. On that initial call with
22 Dechert, did the person you spoke with tell
23 you whom he or she represented?

24 A. Yes.

25 Q. I'm correct in assuming that

1 they told you they represented Purdue?

2 A. Correct.

3 Q. Any other defendants in this
4 litigation?

5 MR. BLANK: I'm sorry,
6 objection.

7 MS. GAFFNEY: I can clarify
8 that question.

9 QUESTIONS BY MS. GAFFNEY:

10 Q. At the time they told you who
11 they represented on that initial phone call,
12 was it Purdue only or were any other
13 defendants mentioned?

14 A. I think they only said Purdue.

15 Q. Okay. And can you describe for
16 me in your own words what this case is about?

17 A. The case from my observation is
18 about two counties in maybe the state of
19 Ohio, I'm not exactly sure, who is claiming
20 that the current opioid crisis is the result
21 of aggressive marketing of and an increase in
22 the availability of prescription opioids.

23 Q. Okay. And why did you decide
24 to testify in this case?

25 A. Because I don't think that's

1 correct.

2 Q. What was your understanding of
3 what your assignment as an expert would be
4 when you were first contacted about this
5 case?

6 A. Was to render my opinion with
7 regards to my -- I'm being distracted a
8 moment. Hold on for just one second. I'm
9 being distracted by people.

10 Q. I understand.

11 A. I apologize.

12 I'll go back on. I apologize
13 for that, but it just pulled my ears away.

14 So ask the question again. I,
15 again, apologize, if you wouldn't mind.

16 Q. No problem at all.

17 The question is, what was your
18 understanding of what your assignment as an
19 expert would be when you were first contacted
20 about this case?

21 A. Okay. What I saw my job to be
22 was to provide the -- Dechert with my opinion
23 with regards to my opinion as to how I viewed
24 the current, you know, opioid crisis, what
25 was -- what was my opinion about that.

1 Q. Okay. And when you say "the
2 current opioid crisis," what does that mean
3 to you?

4 A. Well, it's a complex issue, and
5 it's a complex problem.

6 Q. So when you say "the current
7 opioid crisis," what's the time frame that
8 you're thinking of?

9 A. It begins -- well, it's
10 variable. It begins in the '90s and goes
11 through to current day.

12 Q. When was it that you were first
13 contacted about serving as an expert in this
14 case?

15 A. Mid-March of this year.

16 Q. Do you have a signed retainer
17 agreement?

18 A. I do.

19 Q. And is it between you and
20 Dechert or between you and Purdue?

21 A. I think it's between Dechert
22 and Purdue and me is what my understanding
23 is.

24 Q. Do you remember when you signed
25 this agreement?

1 A. I don't know if it was
2 April 1st or April 8th. I can't -- it was
3 probably April 8th. Okay.

4 Q. Are there any restrictions in
5 your assignment, such as opinions you were
6 asked not to offer or parties you could not
7 offer opinions about?

8 MR. BLANK: Objection.

9 THE WITNESS: Oh, I was
10 never -- I was simply asked to render
11 my opinion obviously.

12 QUESTIONS BY MS. GAFFNEY:

13 Q. And are you rendering your
14 opinion on behalf of Purdue only or any of
15 the other defendants in this case?

16 A. I've been retained by Dechert,
17 and so I -- they were the ones that asked me
18 to produce the work, so I don't know how it's
19 going to be used other than what Dechert and
20 Purdue are choosing to use it. And I don't
21 know that goes -- how that works.

22 Q. But you did not sign a retainer
23 agreement with any other defendant in this
24 litigation?

25 A. Correct.

1 Q. Have you had any in-person or
2 telephone meetings in which representatives
3 of other defendants in this litigation were
4 present?

5 A. No, not that I know of, other
6 than this, what's happening today.

7 Q. Your compensation rate in this
8 matter is \$500 per hour; is that correct?

9 A. Correct.

10 Q. And is that the same rate for
11 deposition, for trial, for travel, or does it
12 vary?

13 A. No, it's -- that's the --
14 that's the rate that it would be charged.

15 Q. How did you determine that
16 rate?

17 A. It's a compilation of 99213s
18 times 4.

19 Q. What does that mean?

20 A. 99213s is the billing --
21 billing for the -- for a visit to a doctor's
22 office, and the compensation rate is about
23 \$125 for a 99213, times it by 4 is \$500.

24 Q. Understood. Thank you.

25 A. You're welcome.

1 I'm.

2 Sorry, it's...

3 Q. Do you have -- do you know
4 roughly how much time you've spent working on
5 the case so far?

6 A. In total, about 60 hours or so.

7 Q. Approximately how much time of
8 that was spent preparing your report?

9 A. Approximately 30.

10 Q. And how much time preparing for
11 your deposition today?

12 A. Probably, let's see, 16.

13 Q. What did you do to prepare for
14 your deposition today?

15 A. I spoke with counsel.

16 Q. In-person meetings or telephone
17 conferences or both?

18 A. In-person meetings.

19 Q. How many in-person meetings?

20 A. Three.

21 Q. When did those take place?

22 A. Last Saturday, I can't recall
23 the date. Monday and Wednesday of this week.

24 So I'd revise my statement. It
25 was about ten hours of preparation now that

1 I've added it up in my head.

2 Q. Okay. Thank you.

3 And that leaves approximately
4 20 hours.

5 How did you spend those other
6 20 hours?

7 A. Reviewing -- I reviewed some of
8 the expert witness information and reviewed
9 my own -- my own expert -- expert
10 presentation, reviewed it a number of times;
11 reviewed my CV to try to get it into my head
12 a little bit more clearly; did some, you
13 know, additional reading on the matter.

14 So that would be what I did.

15 Q. Thank you.

16 And when you say "additional
17 reading," what sort of materials were you
18 reading?

19 A. I read -- you know, I reread
20 some of the articles that I had noted. I
21 wound up looking at some of the information
22 that was presented in some of the expert
23 witness testimony, read some reports from CDC
24 and NIDA and -- is what I did.

25 Q. With respect to the articles

1 that you reread, are there any that stand
2 out?

3 A. None in particular.

4 Q. And how about for the expert
5 witness testimony that you reviewed, were
6 there any expert reports or deposition
7 transcripts that you focused on in
8 particular?

9 A. I looked at Lembke and
10 Schumacher, Schumacher.

11 (Hevern Exhibit 2 marked for
12 identification.)

13 QUESTIONS BY MS. GAFFNEY:

14 Q. I'll mark as Exhibit 2 the
15 invoices that we received.

16 All right. Your counsel
17 provided us with these copies of your
18 invoices.

19 Did you prepare these invoices?

20 A. I did.

21 Q. Okay. And are there any
22 invoices that you have not yet submitted for
23 the work that you've done thus far?

24 A. Yes.

25 Q. Approximately how many hours'

1 work are on the invoice that has not yet been
2 submitted?

3 A. I'm going to say maybe the
4 30 -- 30 hours.

5 Q. Okay. And the 30 hours would
6 be -- when did that work take place?

7 A. In the last two weeks.

8 Q. In the last two weeks.

9 Who pays your invoices?

10 A. Excuse me?

11 Q. Who pays your invoices?

12 For example, does the payment
13 come from Dechert? From Purdue?

14 A. I haven't received any payment
15 yet so I don't know.

16 Q. Fair enough.

17 A. Just --

18 Q. To be determined.

19 Has anyone assisted you with
20 your work on this case?

21 A. No.

22 Q. Other than meeting with your
23 counsel, did you speak with anyone else about
24 your deposition today?

25 A. Just my family. And my -- and

1 work.

2 Q. And what was the nature of your
3 discussions with your family and with work
4 about the deposition?

5 A. They were wondering what I was
6 doing and where I was going and what -- it
7 was simply to inform them of where I was
8 going to be and whether or not I was going to
9 be available or not.

10 (Hevern Exhibit 3 marked for
11 identification.)

12 QUESTIONS BY MS. GAFFNEY:

13 Q. Okay. I'll mark your report
14 and its exhibits as Exhibit 3 to the
15 deposition.

16 I would first like to ask you
17 about your CV.

18 You submitted your CV as
19 Exhibit A to your report; is that correct?

20 A. Correct.

21 Q. And did you prepare this, your
22 CV?

23 A. Yes.

24 Q. Exhibit A includes what appear
25 to be two separately formatted CVs, with the

1 second CV listing honors and awards; is that
2 right?

3 A. Correct.

4 Q. And so just for the sake of
5 clarity, when I refer to your CV, it's to
6 both of them together.

7 A. Yes.

8 Q. All right. Do you have any
9 other versions of your CV that you use for
10 purposes other than litigation?

11 A. This is the only one I have.

12 Q. And you said you reviewed your
13 CV before it was submitted; is that correct?

14 A. Correct.

15 Q. And so is it your testimony
16 that your CV is accurate and up to date?

17 A. It is.

18 Q. So going through your
19 educational background, you obtained your
20 medical degree from SUNY Stony Brook in 1976?

21 A. Correct.

22 Q. Do you recall anything about
23 your medical school training related to use
24 of opioids?

25 A. I don't recall.

1 Q. When you graduated from medical
2 school, what were your views on prescribing
3 opioids?

4 MR. BLANK: Objection.

5 You can answer.

6 THE WITNESS: I saw them as a
7 necessary part of the management of
8 acute medical needs that are
9 associated with pain.

10 QUESTIONS BY MS. GAFFNEY:

11 Q. Could you give me some examples
12 of what those acute medical needs associated
13 with pain entail?

14 MR. BLANK: As of 1976?

15 MS. GAFFNEY: Yes.

16 THE WITNESS: They would have
17 been postoperative treatments and
18 trauma.

19 QUESTIONS BY MS. GAFFNEY:

20 Q. Has your view on prescribing
21 opioids changed since that time?

22 A. No.

23 Q. Your CV states that you
24 completed a family practice residency in
25 Ontario in 1978; is that right?

1 A. Yes.

2 Q. Do you remember if you
3 prescribed opioids to your patients in your
4 family practice residency then?

5 A. I would assume I did, but I
6 can't answer that with definitiveness.

7 Q. Going on the assumption that
8 you did, what sort of conditions would you
9 have prescribed opioids for in that family
10 practice?

11 A. My recollection would have been
12 in an inpatient setting. I don't believe I
13 was asked to manage patients in an outpatient
14 setting with opioids, other than maybe some,
15 you know, again, acute trauma, but it's going
16 back a fair amount of time.

17 Q. Understood.

18 So this was an inpatient
19 setting that was at St. Joseph's Hospital?

20 A. Correct.

21 Q. Could you tell me a little bit
22 about what a family practice residency is in
23 an inpatient setting?

24 When I think of family
25 practice, I think of outpatient.

1 A. Correct.

2 So let me speak then toward the
3 University of Western Ontario.

4 Q. Uh-huh.

5 A. It divided itself between six
6 months' rotation in an inpatient setting and
7 six months' rotation in an outpatient
8 setting. And so in an inpatient setting you
9 were -- in your first year you were treated
10 as an intern and you did whatever service
11 that you were on, a medical service,
12 obstetrical service, pediatric service, et
13 cetera.

14 And then in the second year you
15 were treated as a second-year resident, just
16 as if you were a second year resident in
17 orthopedics or surgery or OB/GYN, et cetera,
18 and you were then in the position to
19 supervise other interns and medical students
20 in that setting.

21 So that's an inpatient setting
22 process.

23 In an outpatient process, it
24 was in a fixed location in which patients in
25 that location remained a cadre of patients

1 that would be passed on from resident to the
2 next resident to the next resident. So
3 that's -- and there was supervising family
4 physicians that kind of oversaw that process.

5 And that would be a general
6 overview.

7 Q. Thank you.

8 And do you remember how you
9 would have used opioids in that time?

10 MR. BLANK: Objection.

11 QUESTIONS BY MS. GAFFNEY:

12 Q. For your patients?

13 MR. BLANK: Objection.

14 THE WITNESS: Again, my -- I
15 don't have a recollection of explicit
16 interactions. My assumption would be
17 that I used them for acute trauma, but
18 I don't know what -- I don't have -- I
19 can't recall explicit events.

20 QUESTIONS BY MS. GAFFNEY:

21 Q. That's fine.

22 So you've mentioned a couple
23 times using opioids for acute trauma, pain
24 related to acute trauma.

25 Is there a point in time when

1 you began prescribing opioids for chronic
2 pain?

3 A. When I established my practice
4 in New Hampshire.

5 Q. And when was that?

6 A. When I established my practice
7 is in 1979.

8 Q. 1979.

9 And why was that a point in
10 time when you began prescribing opioids for
11 chronic pain?

12 A. Surgeons were asking me to
13 essentially consult on patients that were
14 having -- they were having difficulties
15 managing their pain.

16 Q. When you say "surgeons" were
17 asking you to consult, is that in the context
18 of postoperative pain?

19 A. Correct.

20 Q. And how does postoperative pain
21 relate to chronic pain?

22 A. In the instances that I was
23 being consulted, these were major trauma
24 patients in which these patients were -- and
25 the first person I do recall was a woman at

1 the age of 16 or 17 who had at that time
2 already undergone conservatively 12 different
3 abdominal surgeries in her life. And so she
4 had transitioned from short-term
5 postoperative care to really long-term
6 because she was on opioids for all of these
7 acute events.

8 Q. And do you remember with
9 respect to that consultation what the
10 recommendation or care you provided was?

11 A. The general gist of what I did
12 for her and for many people was being able to
13 transition them from IV administration of
14 medications to oral medications so that they
15 could be discharged from the hospital.

16 Q. And what would be the oral
17 medications you would transition this patient
18 and other patients like her to?

19 A. At the time, probably
20 transitioning them to oxycodone and Vicodin,
21 I would imagine, or hydrocodone.

22 Q. Okay. So oxycodone at that
23 time, would that have been a combination
24 product or --

25 A. It would have been Percocet,

1 which is oxycodone and Tylenol, and
2 hydrocodone and Tylenol is Vicodin.

3 Q. How did you achieve that
4 transition?

5 MR. BLANK: Objection.

6 QUESTIONS BY MS. GAFFNEY:

7 Q. And let me clarify. When you
8 said "IV administration of medications," are
9 we also talking about opioid pain relievers
10 IV administration or something else?

11 A. Well, variable, but they were
12 often either IV Dilaudid drips or they were
13 morphine drips or they were Demerol IM.

14 Q. So generally speaking, how
15 would you transition patients from IV
16 Dilaudid or morphine or Demerol IM to
17 Percocet or Vicodin?

18 A. The mechanism that I used was a
19 slow titration off of the IV medications, and
20 that takes -- that took oftentimes days and
21 then transitioning into oral medications.

22 Q. So still talking about that
23 time, which would be the 1980s and early
24 1990s, are there other chronic pain
25 conditions other than these examples of

1 postsurgical pain that has become long-term
2 pain?

3 Are there other chronic pain
4 conditions for which you prescribed opioids
5 in that time frame?

6 A. I would have for failed
7 surgical backs.

8 Q. What does that mean, "a failed
9 surgical back"?

10 A. Patients who had surgery for
11 herniated discs or for other kinds of back
12 trauma in which the symptoms persisted and
13 the -- that would be it. Yeah, symptoms
14 continued after the surgery.

15 Q. Generally speaking, what type
16 of opioid regimen would you prescribe for
17 someone with this situation?

18 MR. BLANK: Objection.

19 THE WITNESS: Challenging to go
20 back that long, but my presumption
21 would have been that I would have been
22 using some combination of methadone
23 and short-acting opioids in addition
24 to a number of other medications.
25

1 QUESTIONS BY MS. GAFFNEY:

2 Q. And what would those other
3 medications be, if you could give a couple
4 examples?

5 A. They would fall into categories
6 of antidepressants, antiseizure medications,
7 muscle relaxants.

8 Q. Okay. A variety?

9 A. Yeah, a variety.

10 Q. Since that time, have your
11 prescribing practices with respect to opioids
12 changed?

13 A. They have evolved.

14 Q. Okay. And how have they
15 evolved?

16 A. There have been new products on
17 the market that I've been able to use, and
18 I've evolved my practice over the last
19 40 years to accommodate those new products.

20 Q. Could you describe that in a
21 little more detail?

22 MR. BLANK: Objection.

23 THE WITNESS: Well, the -- I
24 have utilized long-acting opioids that
25 were not available, when methadone was

1 the only long-acting opioid available.
2 So I've used a combination of
3 methadone, fentanyl patches, morphine
4 sulfate control release. Oxy --
5 oxycodone control release has been my
6 control release.

7 I've used a variety of
8 short-acting medications as well.

9 I have utilized 20 or 30
10 alternative medications, you know, in
11 that period of time that fall into
12 those three general categories that I
13 mentioned above.

14 QUESTIONS BY MS. GAFFNEY:

15 Q. So fair to say then what you're
16 describing, much of the evolution in your
17 prescribing practices has been based on the
18 medications that are available?

19 A. Correct.

20 Q. And have your prescribing
21 practices using these varieties of opioid
22 medications changed with respect to the
23 conditions which you treat with these drugs?

24 A. You lost me on that question.
25 I'm sorry.

1 Q. Trying to be precise, but I
2 realize that was a long question.

3 Let me go back --

4 A. Yes, please.

5 Q. -- because you've described a
6 few instances -- you described postsurgical
7 pain that has become persistent, long-term
8 pain?

9 A. Yes.

10 Q. And you've described failed
11 surgical backs situation.

12 Are there other conditions for
13 which you have used these other opioid
14 formulations?

15 A. Other conditions would include
16 people who've had chronic, nonsurgically
17 curable conditions such as neuropathies due
18 to chemotherapy, neuropathies due to
19 diabetes, central pain syndrome such as
20 fibromyalgia or post-stroke issues, complex
21 regional pain disorder. You know, a variety
22 of different people who've had rheumatoid
23 arthritis, lupus, most recently the
24 development of EDS, which is Ehlers-Danlos
25 syndrome.

1 You name the disease, I've
2 looked at it and I've tried to manage the
3 pain that's been associated with those
4 things.

5 Q. Are there any conditions which
6 in your experience you've found opioids to be
7 not effective?

8 A. I've been able to use a
9 low-dose naltrexone in some of my patients
10 with great -- and so that's an antagonist, an
11 opioid antagonist. That has become available
12 or at least reported over the last number of
13 years, and it seems to be effective in the
14 management of people who have
15 nerve-related -- long-term nerve-related
16 pain.

17 Q. Okay. And again, generally
18 speaking, when you do use opioids to treat
19 the chronic pain conditions that you've just
20 described in your patients, what is the
21 average dose range that you prescribe for
22 your patients?

23 MR. BLANK: Objection.

24 THE WITNESS: There actually is
25 no average dose range.

1 QUESTIONS BY MS. GAFFNEY:

2 Q. Okay. For a patient who has
3 never been on opioids before, what would be
4 the dose range you would start with?

5 MR. BLANK: Objection.

6 THE WITNESS: Actually, if --
7 in the consultative work that I do, if
8 they've not been on opioids, I use all
9 sorts of alternative choices. And if
10 they've already been on those
11 alternative choices, I will then use
12 an opioid.

13 If I start out with an opioid,
14 I'll give you -- if I start out with,
15 for instance, methadone, I start out
16 about 5 milligrams a day.

17 QUESTIONS BY MS. GAFFNEY:

18 Q. Okay. And you said that for
19 patients who have not been on opioids you use
20 all sorts of alternative choices.

21 Is it fair to say that you do
22 not view opioids as a first-line therapy
23 then?

24 A. Correct.

25 Q. What sort of alternatives do

1 you start with instead of opioids?

2 A. Well, many of the ones that
3 category -- I can give you names of drugs.
4 Okay.

5 Q. What categories of --

6 A. Well, the categories are the
7 things that I mentioned: The
8 antidepressants, you know, antiseizure
9 medicines, muscle relaxants, nonsteroidal
10 anti-inflammatories.

11 And some of these unique
12 medications -- interestingly enough, some
13 people respond to anti-Parkinson's
14 medications. Some respond to, believe it or
15 not, antibiotics.

16 So I see such a wide range of
17 people, and my choices are dependent upon
18 what they're presenting me with, I must say.

19 Q. You mentioned as an example
20 when you might start a patient on opioid
21 therapy using 5 milligrams of methadone, are
22 there -- do you tend to go to methadone first
23 if you're trying opioid therapy, or are there
24 other opioids you also utilize?

25 A. I generally utilize -- in

1 initiating medications, I'll generally
2 utilize a low-dose -- opioids that are --
3 okay. I'll take -- separating out acute
4 pain, I will use a mixed-fixed combination.

5 Okay. In people that are
6 chronic, I will use -- I'll try to use a,
7 quote, pure, you know, medication.

8 The reason being is the
9 mixed-fixed combination, Tylenol does induce
10 end organ damage, where the others do not
11 create end organ damage.

12 Q. And when you use the pure
13 medications, which compounds -- or which
14 molecules do you tend to use?

15 A. I use oxycodone, morphine
16 sulfate, and I use tramadol, which is a
17 variation of the theme of a straight opioid.
18 And I use Nucynta, which is also a variation
19 in the theme of opioids.

20 Q. And when you use oxycodone, for
21 example, what's the general dose range that
22 you use?

23 MR. BLANK: Objection.

24 THE WITNESS: Generally we
25 start out with 5 milligrams two to

1 three times a day and then you adjust
2 accordingly.

3 QUESTIONS BY MS. GAFFNEY:

4 Q. And the 5 milligrams two to
5 three times a day, that would be the
6 short-acting oxycodone; is that correct?

7 A. Correct. Right.

8 Q. Are there situations where you
9 would use the long-acting over the
10 short-acting?

11 A. When they have -- when patients
12 have failed at short-acting controlled, we'll
13 go to long-acting controlled -- I mean,
14 long -- excuse me, medicines that have
15 long-acting half-lives or they have a --
16 they're a control release is what I'm trying
17 to say. I apologize.

18 Q. So after patients have failed
19 at short-acting, then you might try the
20 controlled release?

21 A. Correct.

22 Q. And can you explain that to me
23 a little bit?

24 If the patient -- what does
25 that mean if the patient has failed at the

1 short-acting formulation?

2 A. Their symptoms persist. They
3 haven't improved functional activity. They
4 have continued to be unable to participate in
5 either activities of daily living or social
6 interactions or general social settings is
7 what I consider a failure of short-acting
8 medications.

9 Q. And in that context, why might
10 the controlled release help?

11 A. Control-release medicines in
12 general do provide a consistent level of
13 opioids in the system over a period of time,
14 and so you're not going through peaks and
15 troughs of medications that are short-acting.

16 Q. You've described a couple times
17 fairly -- using fairly low doses of opioids
18 with your patients at 5 milligrams of
19 methadone and 5 milligrams of short-acting
20 oxycodone.

21 Is there in your practice an
22 upper range that you would go to in terms of
23 the dosage strength?

24 MR. BLANK: Objection.

25 THE WITNESS: I have -- in my

1 current position, I am managing many
2 legacy patients who have been on
3 higher doses of opiates that I did not
4 initiate. And so I've taken care of
5 people who have been on probably 4 to
6 500 milligrams of oxycodone,
7 400 milligrams of methadone.

8 QUESTIONS BY MS. GAFFNEY:

9 Q. That's a daily amount?

10 A. Yes.

11 Q. But those are legacy patients
12 for whom you did not initiate the medication,
13 that's correct?

14 A. Correct.

15 Q. What about for patients whose
16 opioid treatment started with your care?

17 MR. BLANK: Objection.

18 THE WITNESS: And the question
19 again? I apologize.

20 QUESTIONS BY MS. GAFFNEY:

21 Q. Sure, that was not very clear.

22 In your experience is there --
23 do you perceive an upper bound for the amount
24 of daily dose of opioid that you're
25 comfortable prescribing to your patients?

1 A. There are some upper limits
2 that I begin to say, if you're having more of
3 this, we need to be looking at alternative
4 choices. And generally when people are
5 getting up to about 200 milligrams of
6 oxycodone or its equivalency in maybe
7 morphine sulfate, I begin to say, you know,
8 more may not be better. We need to begin to
9 look at alternative choices or we need to
10 begin to look at all of these other lists of
11 medicines that I have -- categories of
12 medicines that I have indicated before and
13 begin to go through the 20 or 30 meds that I
14 use within the context of that.

15 Comparably, I use a whole
16 different approach to the set of circumstance
17 in terms of getting people to be motivated to
18 increase activity levels, and so I do a
19 pretty comprehensive process with these
20 people.

21 Q. What does that comprehensive
22 process entail?

23 A. Well, I've got about 10 or 20
24 handouts that I give. I give them activity
25 levels that are doable and begin to mark

1 progress based upon that.

2 Q. What sort of information do the
3 10 or 20 handouts cover?

4 A. There are two fanatic groups.
5 The first is to identify that the management
6 of chronic pain syndromes is divided into
7 behavioral changes that are spiritual
8 components, medication management, trust
9 between the physician and the doctor {sic},
10 physical activity. It requires -- it
11 requires the use of adaptive devices. It
12 requires management of expectations.

13 We discuss spirituality, and we
14 discuss choices of them developing a plan of
15 activity and action that they then become
16 adherent to versus me prescribing something.

17 Q. That makes sense.

18 What are the adaptive devices
19 you mentioned?

20 A. I have prescribed shoes, socks,
21 belts, neck braces, hand braces, underwear,
22 canes, wheelchairs, pillows, beds.

23 Q. Okay.

24 A. Those are all adaptive devices
25 that exist in this world.

1 Q. Got it.

2 Why, in your experience, is
3 around 200 milligrams a day the point where
4 you want to start looking at alternatives?

5 A. Certainly the challenge that
6 all patients face currently are the
7 guidelines that have been created by CDC and
8 by insurance companies. And to achieve a
9 prior authorization for more medications
10 greater than that is challenging for me and
11 for the patient. That's number one. There's
12 a barrier that gets created.

13 Two, there is certainly
14 evidence that suggests that increasing doses
15 puts people at some increasing risk for
16 potential overdoses.

17 And finally, the concept of
18 doing more of the same thing doesn't
19 necessarily give you a better outcome.

20 Q. The first factor you mentioned,
21 the CDC guidelines, policies from insurance
22 companies, those have been more recent
23 factors; is that correct?

24 I presume you're speaking of
25 the 2016 CDC guideline?

1 A. Yes, there have been -- there
2 have been both CDC guidelines, there actually
3 have been Medicare guidelines, there have
4 been different insurance company guidelines,
5 and they all kind of been -- been placed in
6 public arenas so that people can review them.

7 And these were discussed in the
8 American Society of Addiction Medicine
9 meetings as early as the 2000s.

10 Q. Okay. So in terms of a factor
11 that you consider in your practice, would
12 these external guidelines have been something
13 that you were considering in the 2000s
14 when -- in terms of the dosage that you
15 prescribe for your patients?

16 A. I've always considered, you
17 know, that -- I mean, even though those
18 guidelines have become more published, I've
19 always considered whether or not more is
20 going to be better, you know. That's been a
21 historical component.

22 Q. And is this general benchmark
23 of approximately 200 milligrams something
24 that has kind of always been the point where
25 you would look at alternatives in your

1 practice, or has that changed over time?

2 A. It has not changed over time.

3 And I'm trying to also say
4 that that number is not the number that then
5 creates my desire to then introduce all of
6 these other medications. It's not like, oh,
7 you hit 200, now we have to consider this.

8 We're doing that on the
9 spectrum of patient care is what I'm trying
10 to say here.

11 Q. That makes sense.

12 And knowing that we're talking
13 about many years of your medical practice
14 here, I'm just wondering about changes over
15 time. And since the first factor you
16 mentioned, the guidelines and insurance
17 policies, I wasn't sure if that had been a
18 more recent factor that you consider or if
19 that has been your consistent practice for
20 decades.

21 A. It has been. That's what I'm
22 trying to indicate by that last statement.

23 Q. And again, speaking generally,
24 how long would you say that you have kept
25 your patients on chronic opioid therapy?

1 MR. BLANK: Objection.

2 THE WITNESS: I have cared for
3 people who have been on chronic opioid
4 therapy for 20, 30 years.

5 QUESTIONS BY MS. GAFFNEY:

6 Q. And those patients who have
7 been on chronic opioid therapy for decades
8 like that, what -- again, generally speaking,
9 what dose of opioid therapy are they on for
10 that length of time?

11 A. Actually very variable. It's
12 not like -- from fairly low doses of one or
13 two Vicodin a day -- well, actually two
14 Vicodin a day, this one fellow, up to this
15 one man that I am caring for who has been
16 on -- who was a legacy patient. He currently
17 is on about 200 or 230 milligrams of morphine
18 per day. I mean, methadone per day. I
19 apologize.

20 Q. And with patients who are on
21 opioid therapy for that length of time, are
22 there things that you do to avoid the issue
23 of dose escalation and tolerance?

24 A. Well, what occurs is that
25 they -- once they achieve these doses, they

1 remain very functional at that. They
2 don't -- that's what I'm saying to you,
3 these -- if you're on them for decades,
4 they've achieved a stable dose.

5 MR. BLANK: Counsel, if you
6 reach a good point, we've been going
7 for a little bit over an hour, so a
8 break would be appropriate.

9 MS. GAFFNEY: Yeah, let's take
10 a break.

11 VIDEOGRAPHER: We're going off
12 the record at 10:12 a.m., and be
13 careful of your microphone, Doctor.

14 THE WITNESS: Oh, great. Thank
15 you.

16 (Off the record at 10:12 a.m.)

17 VIDEOGRAPHER: We're back on
18 the record at 10:36 a.m.

19 QUESTIONS BY MS. GAFFNEY:

20 Q. Welcome back, Dr. Hevern.

21 A. Thank you.

22 Q. Earlier you were testifying
23 about your prescribing practices with respect
24 to opioids and that your prescribing
25 practices have been fairly consistent over

1 time while incorporating newly available
2 formulations.

3 Is that a fair summary?

4 A. Yes.

5 Q. So taking a step back and
6 speaking about the medical community
7 generally, in your view, have the prescribing
8 practices of the overall medical community
9 with respect to opioids changed in the time
10 that you've been practicing, medicine?

11 MR. BLANK: Objection.

12 THE WITNESS: I don't -- I
13 can't tell you about that explicitly
14 because I don't know.

15 QUESTIONS BY MS. GAFFNEY:

16 Q. In your observation practicing
17 medicine for decades, is it your view that
18 prescribing practices have remained
19 consistent with respect to opioids?

20 A. What do you -- I'm not sure
21 what you're trying to ask. I apologize.

22 Go ahead.

23 Q. I'm trying to think about how
24 to phrase this a different way.

25 So looking at the -- and I'll

1 narrow it from the medical community to
2 primary care physicians, family practice
3 doctors like yourself.

4 Is it your view that most
5 family practice doctors prescribe opioids in
6 the same way that you do?

7 MR. BLANK: Objection.

8 THE WITNESS: It's very
9 variable from doctor to doctor.

10 QUESTIONS BY MS. GAFFNEY:

11 Q. And what are some of the
12 variations that you see?

13 A. The variations are doctors not
14 prescribing any to doctors that are
15 comfortable prescribing some or -- some --
16 some more particular -- a particular opioid
17 for their patients.

18 Q. You mentioned earlier that you
19 cared for some legacy patients who are on
20 higher doses than what you would generally
21 prescribe, 4 to 500 milligrams of an opioid a
22 day; is that right?

23 A. Correct.

24 Q. And in your view, would you
25 consider that overprescribing, when these

1 patients come to you on that high of a dose?

2 MR. BLANK: Objection.

3 THE WITNESS: No.

4 QUESTIONS BY MS. GAFFNEY:

5 Q. And why not?

6 A. The patients who present with
7 those doses are still functionally -- excuse
8 me, are still doing -- functionally doing
9 okay at those doses. So they both are
10 tolerating medications and are doing
11 reasonably well on them.

12 Q. You testified when we first
13 began talking that your understanding of the
14 litigation is that the plaintiffs in this
15 case are claiming that the current opioid
16 crisis is the result of aggressive marketing
17 of and an increase in the availability of
18 prescription opioids.

19 And then you testified that you
20 decided to participate in this case as an
21 expert because you don't think that is
22 correct.

23 Do you recall that testimony?

24 A. Yes.

25 Q. So in your view if the current

1 opioid crisis -- in your view, if it's not
2 correct that the opioid crisis is the result
3 of aggressive marketing and an increase in
4 availability of prescription opioids, what do
5 you see as having led to the current opioid
6 crisis?

7 MR. BLANK: Objection.

8 THE WITNESS: Well, that's
9 what's in my report, and so it's in my
10 report.

11 QUESTIONS BY MS. GAFFNEY:

12 Q. Can you answer the question
13 just summarizing in your own words what your
14 view is on this?

15 MR. BLANK: Objection.

16 THE WITNESS: It's a complex
17 issue. Addiction has existed for
18 decades, if not centuries, in the
19 United States, that it's an outcome of
20 a variety of problems that are
21 outlined in my -- in my -- in my
22 expert test -- expert report.

23 QUESTIONS BY MS. GAFFNEY:

24 Q. You testified earlier that in
25 your view when you use the phrase "current

1 opioid crisis," you're referring to something
2 that began in the 1990s and continues to
3 present day; is that correct?

4 A. Correct.

5 Q. So given the view that you just
6 explained about addiction being something
7 that has existed for decades, if not
8 centuries, what led to the beginning of the
9 current opioid crisis in the 1990s?

10 MR. BLANK: Objection.

11 THE WITNESS: Cocaine was the
12 largest challenge in the '80s and
13 '90s. Heroin came back into the --
14 not came back in, but was again fairly
15 available.

16 Again, my report -- I mean, I
17 can repeat the issues in my report,
18 and I will, but the need to address
19 underlying chronic pain conditions as
20 a result of medical problems, the
21 closing of facilities, the challenges
22 of mental health, reduction in a
23 workforce that was providing, you
24 know, valuable resources, emergence of
25 a lot of psychological trauma.

1 So there's many, many factors
2 that are -- and that's what I tried to
3 give in my report.

4 QUESTIONS BY MS. GAFFNEY:

5 Q. And how does the need to
6 address underlying chronic pain conditions as
7 a result of medical problems factor into the
8 development of the opioid crisis?

9 MR. BLANK: Objection.

10 THE WITNESS: How does the
11 what?

12 QUESTIONS BY MS. GAFFNEY:

13 Q. The first factor you listed was
14 the need to address underlying chronic pain
15 conditions as a result of medical problems.

16 How does that factor into the
17 current opioid crisis?

18 MR. BLANK: Objection.

19 THE WITNESS: Well, there was a
20 problem identified in the late '90s
21 and early 2000s that physicians were
22 inadequately managing chronic pain.

23 QUESTIONS BY MS. GAFFNEY:

24 Q. How does that relate to an
25 opioid crisis?

1 MR. BLANK: Objection.

2 THE WITNESS: The pressure was
3 placed upon the hospitals and
4 communities and physicians to address
5 this issue, and one of those
6 medications or a group of medications
7 that could address that issue were
8 opioids.

9 QUESTIONS BY MS. GAFFNEY:

10 Q. So if this group of medications
11 is being used to address a need that had been
12 identified of inadequately managed chronic
13 pain, how does that relate to development of
14 an opioid crisis?

15 MR. BLANK: Objection.

16 THE WITNESS: It's a factor
17 that contributes to medicines that
18 were available -- excuse me, that were
19 available to be diverted.

20 QUESTIONS BY MS. GAFFNEY:

21 Q. So am I correct in
22 understanding what you're saying is that the
23 increased availability of prescription
24 opioids was a factor in the development of
25 the opioid crisis?

1 MR. BLANK: Objection.

2 THE WITNESS: What I'm saying
3 is that the appropriate prescription
4 of opioids to patients who needed them
5 did not contribute to the problem, but
6 there was diversion of medications
7 that did occur.

8 QUESTIONS BY MS. GAFFNEY:

9 Q. And what is your understanding
10 of the diversion of medications that did
11 occur?

12 A. Medicines were taken or stolen
13 from people who were getting prescriptive
14 prescriptions, legitimate prescriptions, and
15 that was a source of diversion.

16 Q. Is it your opinion that all of
17 the opioids that were prescribed for chronic
18 pain were, as you say, legitimate
19 prescriptions?

20 MR. BLANK: Objection.

21 THE WITNESS: As far as I would
22 determine, yes.

23 QUESTIONS BY MS. GAFFNEY:

24 Q. And what's your basis for
25 saying that?

1 A. My own personal experience and
2 the experience of people that I met in
3 different pain conferences that I went to and
4 different -- that were supported by the
5 American Pain Society, that there was a
6 legitimate use for opioids.

7 Q. So just to understand, it's
8 based on your own personal experience but
9 also your knowledge of the prescribing
10 practices of other physicians?

11 A. I don't have personal knowledge
12 of prescribing practices, but, again, it's
13 a -- it is knowledge arrived by conversation
14 with and attendance at educational lectures
15 that were geared toward informing physicians
16 who were managing chronic pain.

17 Q. When you refer to educational
18 lectures, you mentioned a moment ago the
19 American Pain Society.

20 Are you referring to the same
21 thing? Are these educational lectures
22 supported by the American Pain Society?

23 A. There's -- yes.

24 Q. And with this knowledge arrived
25 by a conversation with other physicians and

1 attendants at lectures such as these, did you
2 see a change in prescribing practices over
3 time with respect to opioids?

4 A. There was an increase in the
5 prescriptive -- in prescribing opioids during
6 the 20 years that I attended these lectures,
7 yeah.

8 Q. Going back to what you said a
9 moment ago about diversion and the medicines
10 being taken or stolen from people who were
11 getting legitimate prescriptions as a source
12 of diversion, what's the basis for your
13 saying that?

14 A. Police reports.

15 Q. Your review of police reports;
16 is that what you mean?

17 A. Presentations on TV and radio.

18 Q. In your practice, have any of
19 your patients ever experienced having their
20 prescriptions taken or stolen from them?

21 A. Yes.

22 Q. Are you familiar with the term
23 "pill mill"?

24 A. Yes.

25 Q. And what is your understanding

1 of what that refers to?

2 A. The, I would say, rogue
3 physicians and rogue pharmacists that were
4 writing prescriptions for illegitimate
5 reasons in large quantities for cash in
6 certain locations of the country.

7 Q. And you mentioned certain
8 locations of the country.

9 What are you referring to?

10 A. I understand something existed
11 in Florida, in Appalachia and a couple of
12 other locations, but I haven't taken note of
13 all the locations that have been published on
14 TV.

15 Q. And in your experience
16 practicing medicine in New Hampshire, were
17 you aware of any pill mills in that
18 geographic area?

19 A. None that I know of.

20 Q. In your view, have these pill
21 mills or, as you say, rogue physicians and
22 rogue pharmacists contributed to the
23 development of the opioid crisis?

24 MR. BLANK: Objection.

25 THE WITNESS: I can only assume

1 that they did.

2 QUESTIONS BY MS. GAFFNEY:

3 Q. You state in your report that
4 you've been involved in the care of scores of
5 patients who wanted or needed to be tapered
6 from their opioid-based medications.

7 I can give you a moment.

8 A. Where are we referring to?

9 Q. Page 8. It's the second full
10 paragraph on page 8.

11 A. Yes.

12 Q. So when you say "wanted or
13 needed to be tapered," what do you mean by
14 that?

15 A. In some instances they had come
16 to the end of their acute need of
17 medications, and they were having
18 difficulties stopping their medication.

19 In other instances they had
20 achieved an improved functional capacity and
21 were looking for the lowest effective dose of
22 medication.

23 Q. And you explain that by
24 creating a plan, monitoring the patient and
25 reducing the patient at this low rate

1 successful tapers have been achieved.

2 What does this plan look like,
3 generally speaking?

4 MR. BLANK: Objection.

5 THE WITNESS: It's different
6 for every individual, and it includes
7 medication adjustment downward and
8 providing the alternative meds that I
9 had stated earlier.

10 QUESTIONS BY MS. GAFFNEY:

11 Q. You testified a moment ago that
12 there has been an increase in prescribing
13 opioids during the 20 years that you were
14 attending the lectures that you described
15 earlier.

16 Why do you think there was an
17 increase?

18 MR. BLANK: Objection.

19 THE WITNESS: To meet the unmet
20 need of patients.

21 QUESTIONS BY MS. GAFFNEY:

22 Q. And is it your view that with
23 the increase in opioid prescribing, that that
24 unmet need has now been met?

25 A. It has been improved.

1 Q. In the instances with your
2 patients, if you're starting an opioid naïve
3 patient on opioid therapy, what do you tell
4 the patient about opioids?

5 A. That there are side effects and
6 there are challenges with its -- with their
7 use.

8 Q. What are the side effects you
9 tell your patients about?

10 A. Things like constipation,
11 itching, potentially cognitive changes.

12 Q. Are there any other side
13 effects you tell your patients about with
14 opioid therapy?

15 A. Those are the side effects that
16 I would highlight.

17 Q. Okay. How about the
18 challenges?

19 A. Challenges are they can have
20 emotional changes, either positive or
21 negative, and mostly I dwell on the negative.
22 And there is a -- there are risks for
23 opioid-induced overdose, oftentimes
24 unintentional, and they need to safely manage
25 their medications.

1 Q. How do you recommend that
2 patients address the challenge of the risk of
3 opioid-induced overdose?

4 A. Not to take more than they are
5 prescribed. I check the PDMP to make sure
6 there's no other prescribers and ask them to
7 inform me if there are changes that are
8 occurring that are -- that they're
9 uncomfortable with.

10 Q. What sort of changes?

11 A. Whatever they choose to call me
12 up and tell me about.

13 Q. Do you ever co-prescribe
14 Naloxone with opioid treatment?

15 A. Yes.

16 Q. When do you do that?

17 A. In the initiation of the
18 prescriptive events.

19 Q. For every patient or for
20 certain patients?

21 A. It's now become standard for
22 every patient.

23 Q. When did that change come
24 about, that standard?

25 A. Recently because -- recently,

1 really.

2 Q. Is that something in your
3 practice you started doing five years ago? A
4 year ago? Just approximately?

5 A. Within the last year.

6 Q. So as we've discussed, when you
7 said "current opioid crisis," you said it
8 began in the 1990s.

9 When did you become aware of
10 it?

11 A. Well, addiction has been a part
12 of what I've been doing now since 1979, so
13 it's been ever present in my life in terms of
14 my clinical -- you know, my clinical set of
15 circumstances. So it wasn't like it was an
16 ah-ha moment.

17 Q. And understanding that
18 addiction has been part of your practice as
19 long as you've practiced, you testified that
20 the current opioid crisis began in the 1990s.

21 So would you say that you
22 became aware of it as soon as it began at
23 that time?

24 A. It -- the pattern of use of
25 heroin in the mid-'90s became much more of

1 a -- of something I was clinically seeing in
2 the Riverway Center for Recovery, and that
3 was new in that -- in the city and in that
4 location.

5 Q. And was there a point in time
6 when you were also seeing abuse of
7 prescription opioids in your clinical
8 practice?

9 A. Well, by 1999 the Riverway had
10 closed down, and so I was not performing
11 addiction services at that time, and so --
12 so, no.

13 Q. In your family practice, is
14 that something that you have ever seen,
15 patients abusing prescription opioids?

16 A. Yes, there have been some
17 individuals in the practice.

18 Q. Looking at Exhibit A, your CV,
19 under the heading Licenses and Certificates.

20 A. Yes.

21 Q. One of the listings there is
22 2001, American Pain Society.

23 And do you have a license or a
24 certificate from the American Pain Society?

25 A. That's a society that I belong

1 to, but I'm not licensed by them.

2 Q. And you mentioned earlier
3 attending conferences supported by the
4 American Pain Society.

5 In addition to attending those
6 conferences, how else have you been involved
7 with the American Pain Society?

8 A. Mostly through conference
9 participation.

10 Q. How would you describe the
11 American Pain Society?

12 A. It has been a group of
13 physicians nationally that have been involved
14 with pain management for decades.

15 Q. And how many conferences
16 sponsored by the American Pain Society would
17 you say you've attended? Was it once a year?
18 Twice a year?

19 A. Generally once a year since the
20 early -- maybe mid-'90s.

21 Q. Have you ever held any
22 leadership positions with APS?

23 A. No.

24 Q. Would you say that APS has ever
25 taken positions, issues, with respect to

1 opioids?

2 A. I don't know.

3 Q. Your CV also lists
4 participation as a member of the Manchester
5 Cooperative Pain and Opioid Project?

6 A. Yes.

7 Q. Can you tell me about this
8 project?

9 A. It was a short-lived project
10 that was an attempt to gather the Elliot
11 Hospital, this -- Catholic Medical Center,
12 and Hitchcock Medical Center into a
13 collaboration to begin to look at the -- how
14 were we going to provide services within the
15 community.

16 We had a number of meetings,
17 and the Catholic Medical Center then took
18 leadership in the process, and they have --
19 the cooperative pain project then became
20 their, kind of like, project. And then all
21 of a sudden Elliot Hospital and the -- and
22 Hitchcock kind of like faded out of that
23 process.

24 So I have not -- to be honest
25 with you, I was in it from 2016 to 2017, and

1 I...

2 Oops, I can't do that. I
3 apologize.

4 MR. BLANK: The witness has
5 marked the exhibit --

6 THE WITNESS: I apologize.

7 MR. BLANK: -- correcting it
8 from -- that entry from 2016 to
9 present to 2017.

10 Just letting you know.

11 MS. GAFFNEY: Thank you.

12 THE WITNESS: Sorry.

13 QUESTIONS BY MS. GAFFNEY:

14 Q. Your CV does not include any
15 publications that you've authored.

16 Have you ever published any
17 articles or editorials?

18 A. I have not.

19 Q. Your CV does list a number of
20 lectures and presentations.

21 Would you say that you have
22 kept detailed records of the presentations
23 you've given?

24 A. No, I have not, except for the
25 last few that I -- you know, in the last year

1 or so.

2 Q. I was impressed that you noted
3 that you spoke at the West High School
4 parents night on September 19, 1990.

5 A. Yes.

6 Q. So how do you keep track of
7 details like that?

8 A. I try to enter the events close
9 to when they have happened, so...

10 Q. That makes sense.

11 A. And my nephew was going to
12 school at the time.

13 Q. For the presentations in the
14 last year or so, do you have materials from
15 any of those presentations?

16 A. I have -- for the Pain and
17 Addiction and New Approach to Management
18 Strategies, I have that, and I still have the
19 Chronic Pain in America slides.

20 Q. Okay. Have you provided your
21 counsel with those materials?

22 A. They didn't ask.

23 MS. GAFFNEY: Counsel, we would
24 like to request production of those
25 materials.

1 MR. BLANK: We will take that
2 under advisement.

3 QUESTIONS BY MS. GAFFNEY:

4 Q. One of the presentations
5 listed, it's grand rounds at the University
6 of Massachusetts Medical Center in Worcester
7 on December 8, 1999. The title is "Pain
8 Management in the Emergency Room Setting:
9 Treatment Choices That Reduce Abuse
10 Potential."

11 Do you remember that
12 presentation at all?

13 A. Vaguely.

14 Q. What do you mean -- what did
15 you mean by "treatment choices that reduce
16 abuse potential"?

17 A. Granted, my memory is somewhat
18 selected here, but it was introducing at that
19 time the concept of alternative treatment
20 models to begin to look at frequency of
21 presentations to the emergency room and
22 looking toward -- those would be the things
23 that I would say that I can recall.

24 Q. Alternative treatment models.
25 Alternative to what?

1 A. Alternatives to simply
2 providing pain medications for presentations
3 to the emergency room.

4 Q. And what would be some of those
5 alternative treatment models?

6 A. Again, looking 20 years --
7 20-some-odd years ago, they would have
8 included the uses of nonsteroidal
9 anti-inflammatories. They would have used
10 antidepressants. They would have used at
11 that time short courses of medications of
12 opioids, if you were going to use that.

13 So those were some of the
14 components of really what I spoke toward.

15 Q. You also list a presentation on
16 The Fifth Vital Sign: Effective Management
17 of Acute and Chronic Pain given at Lawrence
18 General Hospital in September of 2001.

19 Do you remember that
20 presentation at all?

21 A. I remember some of that,
22 that -- I remember some of that.

23 Q. What does that refer to, the
24 fifth vital sign?

25 A. The Joint Commission that

1 accredits hospitals had asked hospitals to
2 include in their assessment a patient's pain,
3 and that became the fourth vital sign -- the
4 fifth vital sign, excuse me, in addition to
5 the four that we normally do.

6 Q. So how did you end up giving
7 that presentation?

8 A. I was asked to -- I was asked
9 to provide that presentation as a result of
10 Joe Russell, who was a Purdue rep, who had --
11 who had created -- who linked me with them,
12 that's all I can tell you, through their CME
13 committee.

14 Q. When you say "linked you with
15 them," who is "them" that you're referring
16 to?

17 A. The continuing medical
18 education committee at Lawrence General
19 Hospital.

20 Q. And Joe Russell, the Purdue rep
21 you mentioned, is he a representative who
22 visited your practice frequently, or how did
23 you know Joe Russell?

24 A. He would come two to three
25 times a year.

1 Q. For which years, approximately?

2 A. I don't recall explicitly.

3 MS. GAFFNEY: Go off the
4 record?

5 THE WITNESS: Okay. No,
6 something -- yeah. All of a sudden I
7 felt this move. I apologize.

8 QUESTIONS BY MS. GAFFNEY:

9 Q. So the Purdue representative
10 connected you to the CME team at Lawrence
11 Hospital.

12 Are you aware of whether Purdue
13 sponsored that talk at all?

14 A. They did.

15 Q. Did that sponsorship of that
16 talk involve any honoraria for you as the
17 speaker?

18 A. Yes, it did.

19 Q. And is that something that you
20 disclosed to the audience when giving that
21 talk?

22 MR. BLANK: Objection.

23 THE WITNESS: I probably did,
24 but because -- part of the -- my
25 assumption is yes.

1 QUESTIONS BY MS. GAFFNEY:

2 Q. Looking over this list of
3 presentations, are any other of these
4 presentations here sponsored by drug
5 manufacturers?

6 A. The Recent Advances in
7 Premenstrual Dysphoric Disorder in 2000, you
8 know, was sponsored by Lilly.

9 And the one in 2001,
10 Antidepressant Therapy, was sponsored by
11 Lilly.

12 The Sublocade was -- in 2018
13 was sponsored by Indivior.

14 Those are the ones that strike
15 me in the moment.

16 Q. I have a question about the
17 presentation listed as the Interface of Pain
18 and Addiction --

19 A. Where are you?

20 Q. -- from 2002 in Nashua, New
21 Hampshire.

22 Do you remember a group or a
23 more specific location?

24 To whom was that presentation
25 given?

1 MR. BLANK: Objection.

2 THE WITNESS: I don't recall.

3 QUESTIONS BY MS. GAFFNEY:

4 Q. Why do you think Joe Russell
5 recommended you for the fifth vital sign
6 presentation?

7 MR. BLANK: Objection.

8 THE WITNESS: I don't know. I
9 had gotten to know him, and he knew
10 that I was giving lectures on alcohol
11 abuse.

12 QUESTIONS BY MS. GAFFNEY:

13 Q. At that point you had already
14 given some lectures about chronic pain as
15 well; is that correct?

16 A. Yes, I had.

17 Q. And how did your first lecture
18 related to chronic pain come about?

19 A. A woman by the name of Seddon
20 Savage, who was an addiction specialist at --
21 in the state of New Hampshire, asked me if I
22 would give a presentation.

23 Q. Seddon Savage, is that --

24 A. S-e-d-d-o-n, S-a-v-a-g-e,
25 Seddon Savage.

1 Q. And she was an addiction
2 specialist.

3 Was she also an MD?

4 A. Yes. In anesthesiology.

5 Q. Okay. Turning to Exhibit B of
6 your report is your materials considered.
7 And we now also have the supplemental
8 materials considered list from your counsel.

9 Taking the two together, the
10 materials considered list and the
11 supplemental considered list, do these two
12 lists together identify all the materials
13 that you considered in forming your opinion
14 in this case?

15 A. And my 40 or 50 years of
16 experience in addiction.

17 MR. BLANK: Sorry, Counsel, I
18 don't think you've marked the
19 supplemental list.

20 MS. GAFFNEY: Oh. Thank you.
21 (Hevern Exhibit 4 marked for
22 identification.)

23 MR. BLANK: This will be 4?

24 MS. GAFFNEY: Uh-huh,
25 Exhibit 4.

1 QUESTIONS BY MS. GAFFNEY:

2 Q. How did you determine what
3 materials to note on the materials considered
4 and supplemental materials considered list?

5 A. It was on -- the literature and
6 other materials, those were the readings that
7 I had done and the books that I had perused
8 or actually read, or presentations that I
9 read, and in creating my report referred back
10 to them was what I -- was how it worked.

11 In terms of the materials
12 considered, the -- and the supplemental
13 materials considered, these were information
14 that counsel provided to me.

15 Q. Just to clarify, which
16 materials are you referring to as the ones
17 that counsel provided to you?

18 A. Something called Gerard J.
19 Hevern Supplemental Materials Considered,
20 something called Topic and Materials
21 Considered by Gerard Hevern.

22 Q. Okay. Distinguishing that from
23 the page that starts with literature and
24 other materials?

25 A. That's what I'm saying.

1 Q. Got it. Thank you.

2 And did you ever ask counsel
3 for any specific materials?

4 A. No.

5 Q. With respect to the materials
6 provided by counsel, did you rely on any of
7 these materials for your report?

8 A. No.

9 Q. Supplemental materials
10 considered list, these are all things that
11 you considered after submitting your report,
12 19 expert reports, seven interrogatory
13 responses and one deposition transcript.

14 Why did you review these
15 materials after submitting your report?

16 MR. BLANK: Objection.

17 THE WITNESS: I quickly
18 reviewed them. I read Steven Cohen's
19 and Richard Del La Garza pretty much
20 thoroughly and Catherine Keyes. All
21 the others I just kind of perused.

22 I wanted to essentially see
23 what was being said by different
24 folks.

25 MR. BLANK: A short break would

1 be useful.

2 MS. GAFFNEY: Short break. We
3 can do that.

4 MR. BLANK: Thank you.

5 VIDEOGRAPHER: We're going off
6 the record at 11:27 a.m.

7 (Off the record at 11:27 a.m.)

8 VIDEOGRAPHER: We are back on
9 the record at 11:41 a.m.

10 QUESTIONS BY MS. GAFFNEY:

11 Q. Dr. Hevern, let's go back to
12 your materials considered list. I have a few
13 questions about the materials provided to you
14 by counsel.

15 Your list includes two
16 MDL-produced documents. Let's see, I
17 think -- not the supplemental materials
18 considered list --

19 A. This stuff here?

20 Q. Yes, right at the top.

21 A. Oh, I'm sorry.

22 Q. What are those two documents?

23 A. I actually don't know what they
24 are.

25 Q. Safe to say they did not inform

1 your opinion in your report?

2 MR. BLANK: Objection.

3 THE WITNESS: Correct.

4 QUESTIONS BY MS. GAFFNEY:

5 Q. And how about the Ohio Board of
6 Pharmacy extract format description, what is
7 that document?

8 A. I briefly reviewed it, but I
9 did not -- it was not anything I used for my
10 opinion.

11 Q. Okay. Do you recall what it
12 was?

13 A. Not at this point.

14 Q. And now turning to the
15 literature and other materials list in that
16 same Exhibit B.

17 A. Okay.

18 Q. You testified that this is the
19 list you put together based on readings that
20 you had done or presentations you had read in
21 creating your report; is that correct?

22 A. Correct.

23 Q. So is it your testimony that
24 you've reviewed all of the materials on this
25 list carefully?

1 A. Yes.

2 Q. And you believe that all of the
3 materials listed here are reliable and
4 support your opinions?

5 MR. BLANK: Objection.

6 THE WITNESS: Yes.

7 QUESTIONS BY MS. GAFFNEY:

8 Q. Were any of the materials on
9 this literature list provided to you by
10 counsel?

11 A. No.

12 Q. How did you go about
13 identifying the materials on this list?

14 Did you run searches of the
15 literature, or how did you do that?

16 A. Some I already possessed in my
17 physical possession and others I did Google
18 searches or med -- Medline searches.

19 Q. What sort of search terms did
20 you use for those online searches?

21 A. Multiple.

22 Q. For example?

23 A. Opioid and pain management,
24 ASEM definition of terms, DSM-V cat -- you
25 know, DSM-V categories for the description of

1 addiction, things like that.

2 Q. Did you have any help
3 performing that research?

4 A. No.

5 Q. Do you remember when you did
6 those searches?

7 A. Some of them began in April.
8 Many of them began in April when I started to
9 look.

10 And -- almost all of them were
11 in April. Some of them may have been in
12 early May as I was concluding my report.

13 Q. Before the break, you had
14 mentioned Purdue representative Joe Russell
15 who would come to your office two to three
16 times a year?

17 A. Yes.

18 Q. Would he be promoting certain
19 products when he would call on your office?

20 A. He would be.

21 Q. And what products or product
22 were those?

23 A. It was OxyContin.

24 Q. Did representatives of any
25 other pharmaceutical manufacturers call on

1 your office?

2 A. Yes.

3 Q. Which manufacturers?

4 A. Many. Many.

5 Q. Any that stand out in your
6 memory?

7 A. Not in particular.

8 Q. In these many sales calls, did
9 any representatives ever provide lunch for
10 you or your staff?

11 A. That was the -- that was the
12 format that we used at our office.

13 Q. When you say "that was the
14 format that you used," can you describe that
15 for me?

16 A. Yes.

17 The lunchroom was the only
18 large room that we had, and so if my -- if
19 they were going to do a presentation and my
20 staff was there, they needed to provide them
21 lunch.

22 Q. So the format would be that the
23 sales representative would provide lunch and
24 then during that lunch make a presentation
25 about a product; is that fair?

1 A. Correct.

2 Q. Do any of those product
3 presentations stand out in your recollection?

4 MR. BLANK: Objection.

5 THE WITNESS: There were --
6 there were so many drugs that were new
7 in medicine that none of them stand
8 out particular.

9 QUESTIONS BY MS. GAFFNEY:

10 Q. In your recollection, have you
11 ever prescribed a product based on what you
12 learned from some of these presentations?

13 A. They assisted me in knowing.
14 Most of the time I relied upon the PDR.

15 Q. Are you familiar with the
16 phrase "key opinion leader" or KOL?

17 A. Only since I've read it in some
18 depositions. But not depositions. I mean
19 expert -- I didn't -- I haven't read any
20 depositions, but I mean in the expert witness
21 material that I read.

22 Q. How about the phrase "speakers
23 bureau"? Are you familiar with that?

24 A. Yes, I am.

25 Q. Did you ever serve on a

1 speakers bureau for a drug manufacturer?

2 A. I have.

3 Q. Which manufacturer?

4 A. Lilly.

5 Q. Any others?

6 A. I -- well, I did presentations
7 that was supported by Purdue but not in the
8 speaker bureau format.

9 I did presentations for whoever
10 produces Butrans, and I don't know who that
11 is.

12 And I did presentations for
13 Sublocade, which was Indivior.

14 Q. In the presentations supported
15 by Purdue that you mentioned, were those with
16 respect to a particular product?

17 A. No, those were some of the
18 items that you identified out of all of the
19 material produced by me.

20 Q. How about the -- you testified
21 that you were on a speakers bureau for Lilly?

22 A. Yes.

23 Q. And was that with respect to a
24 particular product?

25 A. Yes.

1 Q. Which product was that?

2 A. Prozac for the use of the
3 dysphoric dysfunction, which you know as
4 premenstrual syndrome, or may know as
5 premenstrual syndrome.

6 Q. Have you received payment for
7 these talks that you've participated in?

8 A. I have.

9 Q. Do you know how much payment
10 you've received over the years?

11 A. Probably less than \$10,000.

12 Q. And how did your involvement on
13 the presentations supported by Purdue come
14 about?

15 A. My recollection was that -- my
16 recollection was that either Joe Russell or a
17 member of the CME committee would contact me.

18 Q. Have you ever served as a
19 consultant to a pharmaceutical company?

20 A. I went to two -- I don't know
21 what you would call them, but two weekend
22 retreats, I guess, to talk about -- in a
23 group setting on two occasions.

24 Q. When did those take place?

25 A. 2014-ish.

1 Q. Both of them in that time
2 frame?

3 A. I believe so.

4 Q. And did both of them involve
5 the same pharmaceutical company or were they
6 different?

7 A. I think the same one. So one
8 was clearly a Purdue product, and the other
9 one I think might have been a Purdue product,
10 but I'm not certain.

11 Q. What were the two products?

12 A. One was Hysingla, and the other
13 was looking at opioid -- or abuse-deterrent
14 properties that were being considered by
15 Purdue.

16 Q. So what was the nature of what
17 you were asked to do on these weekend
18 retreats?

19 A. Be a part of roundtable
20 discussions.

21 Q. And were you compensated for
22 your participation in these discussions?

23 A. Yes. Yes, I was.

24 Q. How much were you compensated?

25 A. They paid for my transportation

1 and my hotel arrangements and a daily fee of
2 maybe a thousand dollars. I'm not certain.

3 Q. So with these products you've
4 been involved with, Prozac, Butrans,
5 Sublocade, Hysingla, have you ever
6 recommended any of these products to
7 colleagues?

8 A. Prozac I did. Hysingla I
9 did -- no, not Hysingla. I mean Sublocade I
10 did. I did not, you know, do any support
11 of Hysingla.

12 Q. Okay. So I have a list I'm
13 just going to run through.

14 Have you ever consulted for or
15 done any work for Endo?

16 A. No.

17 Q. Insys?

18 A. Excuse me?

19 Q. Insys?

20 A. I don't -- no.

21 Q. Teva?

22 A. No.

23 Q. Mallinckrodt?

24 A. No.

25 Q. Allergan?

| | | |
|----|----|--------------------------|
| 1 | A. | No. |
| 2 | Q. | Janssen? |
| 3 | A. | No. |
| 4 | Q. | Or Johnson & Johnson? |
| 5 | A. | No. |
| 6 | Q. | Okay. AmerisourceBergen? |
| 7 | A. | No. |
| 8 | Q. | Anda? |
| 9 | A. | No. |
| 10 | Q. | Cardinal Health? |
| 11 | A. | No. |
| 12 | Q. | CVS Pharmacy? |
| 13 | A. | No. |
| 14 | Q. | Discount Drug Mart? |
| 15 | A. | No. |
| 16 | Q. | HD Smith? |
| 17 | A. | No. |
| 18 | Q. | Health Mart Systems? |
| 19 | A. | No. |
| 20 | Q. | Henry Schein? |
| 21 | A. | No. |
| 22 | Q. | McKesson? |
| 23 | A. | No. |
| 24 | Q. | Rite Aid? |
| 25 | A. | No. |

1 Q. Walgreens?

2 A. No.

3 Q. Walmart?

4 A. No.

5 Q. Okay. Thank you.

6 Do you have any personal
7 relationships with any current or former
8 employees at any of the drug manufacturers
9 we've been discussing?

10 A. No.

11 Q. You mentioned a moment ago with
12 respect to the Purdue presentations you
13 participated in that you were contacted by
14 Joe Russell or maybe a representative from a
15 CME committee?

16 A. Correct.

17 Q. The CME committees, do you
18 remember what organization those CME
19 committees belonged to or --

20 A. Well, Lawrence General was one.
21 The VA system was the other. Those are the
22 two that I -- but those would be the things
23 that I can recall.

24 Q. Okay. And in those two
25 examples -- say, for example, you were

1 contacted by someone working on the CME
2 committee for the VA, when did you learn that
3 it was -- the presentation you were giving
4 was sponsored by Purdue?

5 A. At the time that it was booked.

6 Q. And you said that you prepared
7 the presentation materials that you would
8 use?

9 A. Yes.

10 Q. Did Purdue review those at all?

11 A. No.

12 Q. So turning now to your report
13 itself, you testified earlier that you didn't
14 have any assistance in drafting your report;
15 is that correct?

16 A. Correct.

17 Q. So every word and citation in
18 the report you drafted?

19 A. Yes.

20 Q. Okay. Can you summarize for me
21 in your own words the opinions that you're
22 offering in this report?

23 MR. BLANK: Objection.

24 THE WITNESS: In general that
25 addiction has been a chronic problem

1 in our society; that factors that
2 contribute to addiction include
3 underlying mental health problems,
4 family history, social and
5 environmental events, biological
6 issues of the individual; and that the
7 mental health system was not adequate
8 to deal with the burgeoning problems
9 that were occurring.

10 QUESTIONS BY MS. GAFFNEY:

11 Q. Thank you.

12 When would you say you formed
13 these opinions?

14 A. They've been formed over the 40
15 to 50 years of my work, and the opinions
16 about this process -- or the opinions about
17 this paper really was the culmination of some
18 of the reports that I gave in 2016 and 2018.

19 Q. And what are those reports in
20 2016 and 2018 you're referring to?

21 A. They're on my CV, and they are
22 essentially the same presentation that I gave
23 that began with -- well, actually 2017, with
24 Management of Chronic Pain and Coexisting
25 Disorders; 2018, the presentation I gave to

1 the New Hampshire Academy of Family Practice
2 and to the American Academy of Family
3 Practice national conference for residents in
4 2018.

5 Q. So looking back at the summary
6 of opinions you just went through, addiction
7 being a chronic problem in society, various
8 factors contributing to that including mental
9 health, social context, family, environmental
10 and biological context of the individual, and
11 then the mental health system not being
12 adequate to address these issues, are there
13 other opinions that you're -- you would
14 summarize as opinions you're offering in your
15 report?

16 MR. BLANK: Objection.

17 THE WITNESS: My report also
18 includes issues of the availability of
19 takeback components of medications.

20 The -- would be what I would
21 say.

22 QUESTIONS BY MS. GAFFNEY:

23 Q. Are you offering any opinion in
24 this case on the efficacy of opioids for
25 chronic pain?

1 MR. BLANK: Objection.

2 THE WITNESS: That's not what I
3 was asked, you know, to comment on.

4 QUESTIONS BY MS. GAFFNEY:

5 Q. Okay. So just to clarify that,
6 it's not an opinion you're offering in this
7 case?

8 A. That's correct.

9 Q. And, Dr. Hevern, you understand
10 that one of the purposes of submitting your
11 expert report is to disclose to the other
12 side and the Court all of the opinions you
13 will be offering in the case and then the
14 support for those opinions in advance of
15 trial; is that correct?

16 A. I do.

17 Q. So you don't intend to offer
18 any opinions that are not put forth in your
19 expert report at trial; is that also correct?

20 A. Not unless something new comes
21 up.

22 Q. And in terms of understanding
23 the bases for your opinions, are all of the
24 materials that you would consider a basis for
25 your opinions, in addition to your clinical

1 experience, provided in the materials
2 considered list?

3 A. Yes.

4 Q. Your report also contains
5 various footnotes.

6 Is that fair to say that where
7 you've identified materials supporting a
8 specific point in your report, you've
9 provided that in a footnote?

10 A. Yes.

11 Q. Where you have provided
12 footnotes in your report, is it your
13 testimony that these contain all of the
14 support for that particular point that they
15 correspond to?

16 MR. BLANK: Objection.

17 THE WITNESS: Yes.

18 QUESTIONS BY MS. GAFFNEY:

19 Q. So for the statements that are
20 in your report without specific footnotes, is
21 it fair to say that the support for these
22 statements is your clinical experience?

23 A. Yes.

24 Q. So looking at the section in
25 your report called Historical Background,

1 Americans' Fascination with Drugs --

2 A. What page is that, please?

3 Q. It starts on the bottom of
4 page 3.

5 A. Okay.

6 Q. Goes on to 4.

7 A. All right.

8 Q. And then the first full
9 paragraph on page 4, you mention morphine and
10 widespread incidence of addiction in the
11 1800s; is that right?

12 A. Correct.

13 Q. And you describe the occurrence
14 of morphine addiction as related to the Civil
15 War and war-related injuries.

16 What is the basis for that
17 statement?

18 A. The research that I did for one
19 of my papers and what is common knowledge for
20 experts who have dealt with addiction.

21 Q. What is the research that you
22 did for one of your papers?

23 Just to clarify what you just
24 mentioned, what are you referring to there?

25 A. Hold on for a second.

1 Q. Uh-huh.

2 A. So in November 18, 2016, Drug
3 Abuse and the Never-Ending Saga was the
4 presentation I gave at the Elliot Hospital
5 grand rounds. And during that period of
6 time, I did all of the -- a significant
7 amount of reading around the process of
8 substance use disorder and some of the
9 origins of that.

10 Q. And are those materials that
11 you read listed in your materials considered
12 list?

13 A. No, they're not.

14 Q. So in terms of what you're
15 relying on as a basis for your statements in
16 your report here in this paragraph, is your
17 testimony that you're relying on materials
18 that have not been disclosed?

19 MR. BLANK: Objection.

20 THE WITNESS: This knowledge is
21 widely available to addiction
22 specialists, and I was placing this
23 information that is widely known to us
24 into this report so that it would have
25 context, historical context, of what

1 has gone on.

2 QUESTIONS BY MS. GAFFNEY:

3 Q. Do you recall what some of
4 those materials that you read that are not
5 disclosed here were?

6 MR. BLANK: Objection.

7 QUESTIONS BY MS. GAFFNEY:

8 Q. With respect to this history?

9 A. There is a -- there's a
10 textbook I have at home that was written in
11 probably 1909 that I have that I read through
12 about morphine and morphine use.

13 Q. Have you read David
14 Courtwright's book Drug Paradise?

15 A. No.

16 Q. Did you read David
17 Courtwright's expert report?

18 A. No.

19 Q. It is listed on your materials
20 considered list.

21 Did you consider it at all?

22 A. Not in the formation of my
23 presentation here. I looked at this data
24 afterwards.

25 Q. Are you intending to offer a

1 rebuttal opinion to his report with respect
2 to the way you've characterized the morphine
3 addiction of the late 1800s?

4 A. I'm not -- I was not asked to
5 rebut anything.

6 Q. You also have the statement
7 that "elixirs containing varying amounts of
8 alcohol, opium, morphine, cocaine and heroin
9 were sold without government regulation until
10 1920."

11 What is your basis for that
12 statement?

13 A. The development of the Harris
14 Act.

15 Q. Do you know when that
16 legislation was enacted, sir?

17 A. 1920 -- well, between 1918 and
18 1921.

19 Q. Still looking at this
20 description of the historical context in your
21 report, you describe some issues with
22 Vicodin, Darvocet and Percocet in the 1980s;
23 is that correct?

24 A. Correct.

25 Q. But your description of the

1 historical context does not note any other
2 prescription opioid abuse.

3 Why is that?

4 A. Because in the 1990s when I was
5 running the chemical dependency unit at the
6 CMC, those were the drugs that we were
7 detoxing.

8 Q. And in the late 1990s and early
9 2000s, to your knowledge, was there -- were
10 there any issues with prescription opioid
11 abuse?

12 MR. BLANK: Objection.

13 THE WITNESS: I was no longer
14 running the chemical dependency unit.
15 I was an independent practitioner at
16 that time.

17 QUESTIONS BY MS. GAFFNEY:

18 Q. And as an independent
19 practitioner at that time, were you aware of
20 any issues with prescription opioid abuse?

21 MR. BLANK: Objection.

22 THE WITNESS: I was reading
23 about that. I was not personally or
24 professionally involved in the
25 management other than a

1 consultative -- selective
2 consultations, and that's my
3 knowledge.

4 QUESTIONS BY MS. GAFFNEY:

5 Q. But you were reading about the
6 existence of issues with prescription opioid
7 abuse at that time?

8 A. Yes.

9 Q. Is there a reason why you did
10 not include it in your history section in
11 your report?

12 A. Ask the question again? Say
13 that one more time?

14 Q. Is there a reason why you do
15 not include prescription opioid abuse in the
16 late 1990s and early 2000s in your history
17 section of your report?

18 MR. BLANK: Objection.

19 THE WITNESS: I did.

20 QUESTIONS BY MS. GAFFNEY:

21 Q. Can you point me to that?

22 A. Yeah. Fifth paragraph, "Thus
23 dentists, oral surgeons, orthopedic surgeons
24 were prescribing Vicodin, along with other
25 prescription opioids, including Darvocet and

1 Percocet."

2 Q. Okay. And this starts with
3 "around the same time."

4 Is your testimony that this is
5 intended to describe the late 1990s and early
6 2000s?

7 Because the prior paragraph
8 describes the 1980s.

9 A. Correct. And '80s
10 transitioning into the '90s, this was what
11 was happening.

12 Q. Okay. And were you aware of
13 issues with OxyContin abuse in the late 1990s
14 and early 2000s?

15 MR. BLANK: Objection.

16 THE WITNESS: Not specifically.

17 QUESTIONS BY MS. GAFFNEY:

18 Q. Were you aware that there were
19 Congressional hearings about OxyContin abuse
20 in the early 2000s?

21 A. In the early 2000s? No, I did
22 not. I don't recall that.

23 Q. It's around that time that you
24 were giving presentations for Purdue,
25 correct?

1 MR. BLANK: Still in the early
2 2000s?

3 MS. GAFFNEY: In the early
4 2000s, yes.

5 THE WITNESS: Let me take a
6 look.

7 I was giving lectures around
8 abuse and diversion and drug impact on
9 society, but I did not read any
10 Congressional hearings is what I'm
11 trying to say to you.

12 QUESTIONS BY MS. GAFFNEY:

13 Q. You were giving lectures around
14 abuse and diversion and drug impact on
15 society.

16 What sort of abuse and
17 diversion and drug impact are you referring
18 to?

19 A. Issues of prescription drugs
20 that were being diverted. That was the --
21 you know, and how they were presenting to
22 emergency rooms and to -- and to office --
23 and to private offices.

24 Q. And were you aware of any
25 issues with OxyContin in particular being

1 diverted at that time?

2 A. Yes.

3 Q. Is there a reason why you did
4 not note that in your expert report, in your
5 historical summary?

6 MR. BLANK: Objection.

7 THE WITNESS: No.

8 QUESTIONS BY MS. GAFFNEY:

9 Q. You state that in the 2000s --
10 it's on page 5, the second -- or the first
11 full paragraph, "The illegal drug cartels
12 that were supplying heroin began to lace it
13 with fentanyl."

14 What's your basis for that
15 statement?

16 A. Two general sources: what was
17 being reported on TV and radio and what was
18 being produced in literature surrounding drug
19 overdoses in CDC materials.

20 Q. Is the literature that you
21 mentioned included in your materials
22 considered list?

23 A. I'm sorry?

24 Q. The literature that you just
25 mentioned, is that included in your materials

1 considered list?

2 A. It would be with the CDC
3 reports.

4 Q. Okay. And as you don't have a
5 footnote citation for this paragraph, can you
6 point me to the sources that you're relying
7 on for this paragraph?

8 A. Some of it would be in
9 number 5, 2002 to 2013, some of the CD --
10 drug abuse and government, and then there are
11 different ones throughout here from CDC's
12 reports.

13 Q. Can you point me to the
14 particular sources in the -- this is for the
15 statement about fentanyl appearing in the
16 2000s.

17 A. They -- here they are. Okay.
18 In the footnotes -- here it is. Centers for
19 Disease Control Prevention FastStats
20 retrieved from the CDC -- that's on
21 tobacco -- the Centers for Disease Control
22 and Prevention for drug overdoses are the two
23 locations that I would have gone to. So
24 those would -- those would begin to give me
25 information about the -- those components of

1 really what was happening.

2 I'd have to go through all of
3 these. I'm quickly reading through them.

4 So those would be two of the
5 sources.

6 Q. So the two CDC sources - one,
7 as you noted, is about tobacco, and the
8 other, the title is "US Opioid Prescribing
9 Rate Maps" - how do those support the
10 statement of fentanyl appearing in the 2000s
11 by way of illegal drug cartels?

12 A. The other source was the
13 National Institute of Drug Abuse, drug trends
14 2015.

15 Q. Okay. And just going back to
16 my question about the two CDC sources.

17 A. Yes.

18 Q. The one about tobacco and the
19 other one about opioid prescribing rates, how
20 do those support the statement of fentanyl
21 appearing in the 2000s by way of illegal drug
22 cartels?

23 A. There were two -- two
24 components what I said to you is the first
25 one is that was -- that became knowledge

1 through releases on TV and on radio from the
2 CDC about those things, and that was being
3 published in different alerts from them.

4 So those are not noted, but
5 they were noted by TV and radio. Those
6 specific items would have referred to those
7 in the documentation.

8 Q. The CDC FastStats on tobacco?

9 A. That would be on the tobacco
10 one.

11 There -- it would be for the,
12 you know, opioid prescription rates and
13 retrieve what they -- those would be items
14 that would be listed in the CDC reports.

15 Q. With respect to fentanyl coming
16 through illegal drug cartels?

17 A. I believe so.

18 Q. Okay. So as we discussed a few
19 minutes ago, disclosing the materials
20 considered, the materials that are forming
21 the bases for your opinion, is important to
22 the plaintiffs in litigation as well as the
23 Court.

24 You've submitted an expert
25 report and materials considered list. You

1 have stated that the statements in your
2 report that do not have footnote citations
3 are supported by your clinical experience.

4 So I'm just trying to
5 understand the support for the statement in
6 this paragraph in particular about illegal
7 drug cartels in the 2000s.

8 Is it your testimony that your
9 knowledge -- the basis for this statement is
10 what you saw on TV and heard on the radio, in
11 addition to the two CDC documents here as
12 well as the National Institute on Drug Abuse
13 publication from 2015?

14 MR. BLANK: Objection.

15 THE WITNESS: Yes, and
16 additional readings from CDC reports.
17 So it's a combination of all of those
18 things.

19 QUESTIONS BY MS. GAFFNEY:

20 Q. Dr. Hevern, to the extent that
21 there are additional readings that you are
22 relying on as a basis for your expert
23 opinion, I would ask that you disclose those
24 sources.

25 A. Okay.

1 MR. BLANK: When you get to a
2 good breaking point, it's about 12:30,
3 so let us know if you're close.

4 MS. GAFFNEY: Sure. This is a
5 good breaking point now.

6 MR. BLANK: Okay.

7 VIDEOGRAPHER: We're going off
8 the record at 12:29 p.m.

9 (Off the record at 12:29 p.m.)

10 (Hevern Exhibit 5 marked for
11 identification.)

12 VIDEOGRAPHER: We're back on
13 the record at 1:24 p.m.

14 QUESTIONS BY MS. GAFFNEY:

15 Q. Welcome back, Dr. Hevern.

16 A. Yes.

17 Q. Your counsel provided us with
18 an amended page 4 of your complaint {sic},
19 which we'll mark it as Exhibit 5.

20 A. Yes.

21 Q. What was the change you made on
22 this page?

23 A. Excuse me. On the top line,
24 the amended version says, "By comparison,
25 there's approximately 47,000 opioid-related

1 deaths each year in 2016, 2017."

2 Q. Okay. And what was the change?

3 A. It had read, "By comparison,
4 there was approximately 47,000 prescription
5 opioid-related deaths each year in 2016 and
6 2017."

7 Q. Okay. Thank you.

8 And how did you come to believe
9 this change was necessary?

10 A. When I was reading the
11 transcript -- not transcription -- excuse me,
12 my report last night, I looked at it and I
13 said, "That's wrong."

14 Q. Okay. So you carefully
15 reviewed page 4, clearly.

16 You carefully reviewed the rest
17 of your report as well, I take it?

18 A. Yes, I have.

19 Q. Any other changes to your
20 report?

21 A. No.

22 Q. Okay. Thank you.

23 On page 5 of your report, right
24 before the heading Addiction, that last
25 paragraph in the history summary of your

1 report, you state that, "History teaches us
2 that there has always been, and likely always
3 will be, a segment of the population that is
4 susceptible to developing drug-seeking
5 behavior, and the predominant drugs of abuse
6 will vary or rotate over time."

7 Did I read that correctly?

8 A. Yes.

9 Q. And what is the basis for your
10 statement here?

11 A. Both my clinical observation
12 and management of patients in -- or who had
13 addiction, the report from the drug abuse and
14 government publication that I list.

15 Q. In footnote 5?

16 A. That's what I meant, uh-huh.

17 Q. Okay.

18 A. That's what I meant, I'm sorry.

19 Q. Is there anything else on your
20 materials considered list that you're relying
21 on for that statement?

22 A. None.

23 Q. And this citation in footnote 5
24 notes that, "Between 2002 and 2013, there was
25 a remarkably stable percentage of the

1 population, between 8 to 10 percent, that
2 abused illicit drugs, representing a
3 persistent population susceptible to
4 developing substance abuse."

5 Did I read that correctly?

6 A. Yes.

7 Q. And how do you define the term
8 "abuse"?

9 Here it's used, "abuse illicit
10 drugs," and then you reference substance
11 abuse.

12 A. Substance -- they're
13 interchangeable. Substance abuse and abuse
14 of illicit drugs are generally
15 interchangeable.

16 Q. And what does "abuse" mean in
17 the context of drug use?

18 A. Misusing a drug or alcohol and
19 becoming somehow impaired but not becoming
20 addicted to it.

21 Q. Is there a difference between
22 misuse and abuse?

23 A. Technically, I don't think so.

24 Q. And then how would you define
25 addiction?

1 A. Addiction, it's -- it's in my
2 definition here. Should I read it? Page 6,
3 second paragraph.

4 Q. No, that's fine to point to
5 this paragraph.

6 A. Okay.

7 Q. Okay. And then in your own
8 words, how does that differ from dependence?

9 A. Dependence is an outcome of the
10 use of many different kinds of medications.

11 An addiction is a misuse of
12 those medications in a manner that creates
13 craving and difficulties for the individual.

14 Q. And in your experience, are
15 there people who are dependent on drugs but
16 not abusing them?

17 A. That's a challenging question.
18 Many different categories of drugs you can
19 become dependent upon.

20 I'm assuming you're talking
21 about opioids?

22 Q. That's a fair assumption, but
23 actually my question was more general.

24 So what does it mean to be
25 dependent on drugs, whether it's opioids or

1 another category?

2 A. Oh, dependency would mean that
3 at the -- if you abruptly stop the
4 medication, you'll have symptoms or a
5 negative outcome.

6 Q. Okay. So if I understand
7 correctly, it is possible to become dependent
8 on drugs without abusing them; is that
9 correct?

10 A. Correct.

11 Q. And conversely, is it also
12 possible to abuse drugs without becoming
13 dependent on them?

14 A. Yes.

15 Q. So going back to footnote 5,
16 this percentage of the population susceptible
17 to developing substance abuse, the 8 to
18 10 percent you cite here, that does not take
19 into account a percentage of the population
20 that may be dependent on -- well, in this
21 context, dependent on opioids but not abusing
22 them; is that correct?

23 MR. BLANK: Objection.

24 THE WITNESS: Could you ask
25 that question again? I lost --

1 QUESTIONS BY MS. GAFFNEY:

2 Q. Uh-huh.

3 You represent in footnote 5
4 that there's a stable percentage of the
5 population, between 8 to 10 percent, that is
6 susceptible to developing substance abuse.

7 And as we were just discussing,
8 substance abuse and dependence are different
9 concepts.

10 A. Substance abuse and
11 dependence --

12 Q. Dependence --

13 A. -- are different concepts, yes.

14 Q. So this -- is it correct to say
15 that this 8 to 10 percent proportion of the
16 population does not take into account
17 individuals who are dependent on, for
18 example, prescription opioids but not abusing
19 them?

20 A. I'd want to reread the entire
21 component of it, but that's how I would
22 interpret that.

23 Q. Okay.

24 A. Hold on for just one second.

25 Thank you.

1 Q. And you said dependency would
2 mean that if you abruptly stop the
3 medication, the patient would have symptoms
4 or a negative outcome.

5 Have you seen that happen in
6 your practice with patients who are dependent
7 on opioids?

8 A. Yes.

9 Q. And in your experience with
10 these patients, what has happened -- well,
11 first of all, to back up.

12 What was the reason for the
13 abrupt stop in medication that led to this
14 outcome that you've seen in your practice?

15 MR. BLANK: Objection.

16 THE WITNESS: These are people
17 who have been referred to me whose
18 medications have been stopped by other
19 physicians.

20 QUESTIONS BY MS. GAFFNEY:

21 Q. In your own practice, as we
22 spoke about this morning, you do not
23 generally abruptly stop patients' opioid
24 medications; is that correct?

25 A. That's correct.

1 Q. But you do have clinical
2 experience with patients who have had those
3 medications abruptly stopped by other
4 physicians and then referred to you for
5 management of the symptoms they're
6 experiencing?

7 A. That's correct.

8 Q. And what do you do in that
9 situation to assist patients who are
10 experiencing -- fair to say they're
11 experiencing withdrawal what we're
12 discussing?

13 A. Yes.

14 Q. How do you assist patients in
15 that -- who are experiencing withdrawal?

16 A. How do I --

17 MR. BLANK: Objection.

18 THE WITNESS: I apologize.

19 How do I what?

20 QUESTIONS BY MS. GAFFNEY:

21 Q. Assist patients --

22 A. Oh, assist, I'm sorry.

23 Q. -- who are experiencing
24 withdrawal?

25 A. There are two approaches that I

1 can take. The first is to treat them with a
2 combination of medications that treat
3 symptoms. The second is to introduce then
4 the use of buprenorphine or Suboxone as a
5 medically assisted treatment for substance
6 abuse disorder.

7 Q. And the first option, the
8 combination of medications that treat
9 symptoms, what's the combination of
10 medications you would use?

11 A. The names of medications, or
12 what would you -- or the categories?

13 Q. Or the categories, yeah.

14 A. Well, one is to help prevent
15 nausea. One is to help prevent diarrhea.
16 One is to help prevent the gooseflesh skin
17 and the sweating that's accompanied by that.
18 And depending on how emotionally agitated,
19 you would use a medicine to reduce anxiety.

20 Q. And what are the factors you
21 consider with a patient in terms of choosing
22 that first option of treating the withdrawal
23 symptoms versus initiation of buprenorphine
24 or Suboxone?

25 A. The choice would be based upon

1 whether or not the patient is -- has
2 demonstrated opioid addiction, and that's why
3 they're withdrawing versus -- and if so, I
4 would then offer them the use of Suboxone to
5 treat their addiction and put them in what we
6 call a medically-assisted treatment.

7 Q. Just going back, you said if
8 they demonstrated addiction and that's why
9 they're withdrawing versus -- what's the end
10 of that sentence? Versus...

11 A. Oh, if they are -- I have to
12 read the -- I apologize. I don't mean to --

13 Q. Do you want me to reread it?

14 A. If you wouldn't mind, I'll pick
15 it up from that point.

16 Q. So you said, "The choice would
17 be based upon whether or not the patient has
18 demonstrated opioid addiction and that's
19 what -- why they're withdrawing versus" --

20 A. That the medication was
21 abruptly stopped by another physician because
22 they were no longer prescribing that
23 medication to them.

24 Q. Am I correct to understand
25 meaning that it's a situation of dependence

1 but not addiction?

2 A. That's what I'm trying to
3 indicate.

4 Q. I take it you have a waiver to
5 prescribe buprenorphine; is that right?

6 A. Correct.

7 Q. When did you obtain that
8 waiver?

9 A. I believe in 2013.

10 Q. In your report you discuss the
11 concept of pseudoaddiction.

12 Is that something that you
13 would say you've seen in your practice?

14 A. Yes.

15 Q. And in those instances of
16 pseudoaddiction in your practice, would you
17 address the phenomenon of pseudoaddiction by
18 increasing the opioid dose?

19 A. I address that in both
20 inpatient and outpatient settings, and the
21 way to address it is by adjusting
22 medications, either frequency or amount, or
23 changing the medication altogether.

24 Q. And when you say "adjusting
25 either frequency or amount," can you

1 elaborate on what that looks like?

2 MR. BLANK: Objection.

3 THE WITNESS: In an inpatient
4 setting, they may be giving a
5 medication every eight hours when they
6 should be giving it every four hours.
7 And so I write the order to be every
8 four hours, so that's a frequency.

9 And the other is that they're
10 giving a low dose of medication, and
11 you increase the actual milligram per
12 dose that they're getting, but the
13 frequency or the interval between each
14 dosing remains the same.

15 QUESTIONS BY MS. GAFFNEY:

16 Q. How many patients would you say
17 you have treated with -- that exhibit
18 pseudoaddiction?

19 A. A few hundred probably.

20 Q. And how do you know in those
21 situations that it is pseudoaddiction and not
22 addiction?

23 A. Most often because they respond
24 to my adjustments in their medication.
25 They -- the symptoms that they're having,

1 they are resolved.

2 Q. And in your experience, could a
3 patient be exhibiting signs of addiction and
4 still have those behaviors resolved by
5 adjustments in medication?

6 A. The symptoms would abate, but
7 addiction would move them to misuse that
8 medicine again.

9 Q. Okay. Looking at page 7 of
10 your report --

11 A. Okay.

12 Q. -- underneath the heading,
13 "Opioids Prescribing Versus Opioids Abuse,"
14 you have the statement, "For patients with no
15 history of substance abuse or mental health
16 issues, the risks -- the risk of iatrogenic
17 addiction is low."

18 What is the basis for this
19 opinion?

20 A. Data that I've read through
21 different reports.

22 Q. And in this paragraph you have
23 two footnote citations.

24 Is that some of the reports
25 you're referring to?

1 A. I don't know if those explicit
2 ones are the ones that I'm referring to --
3 I'd have to reread the article -- but those
4 data are in the handout.

5 I'd have to relook at that
6 explicit form to say -- to link those two
7 precisely.

8 Q. Okay. So just to understand --
9 so as you sit here today, can you point me to
10 the -- any sources that you're relying on for
11 the statement that "the risk of iatrogenic
12 addiction is low for patients with no history
13 of substance abuse or mental health issues"?

14 MR. BLANK: Objection.

15 THE WITNESS: What I can say is
16 it's -- it's in -- I can't select in
17 the moment through these 50 or 60
18 references in the moment, you know,
19 that reference, but it would be in
20 here.

21 QUESTIONS BY MS. GAFFNEY:

22 Q. So your testimony is that the
23 basis for this opinion exists in your
24 materials considered list, but you did not
25 provide a footnote for it?

1 MR. BLANK: Objection.

2 THE WITNESS: Well, the
3 footnote is number 7, is what I'm
4 saying to you, is what I'm
5 referencing.

6 Are there other references
7 within the list? I'm saying there
8 probably is, but I'm not going to be
9 able to pull them out and begin to
10 finger point them to you.

11 QUESTIONS BY MS. GAFFNEY:

12 Q. When did you form this opinion?

13 A. Which opinion?

14 Q. That for patients with no
15 history of substance abuse or mental health
16 issues, the risk of iatrogenic addiction is
17 low.

18 A. When I began to look at this
19 issue back in probably the early '90s, maybe
20 the late '80s.

21 Q. Do you consider yourself to be
22 familiar with the literature on this issue?

23 A. Yes.

24 Q. And is it your opinion that all
25 of the literature on this issue uniformly

1 supports your statement?

2 MR. BLANK: Objection.

3 THE WITNESS: There's a wide
4 range of -- there's a wide range
5 within the definition of addiction --
6 of iatrogenic addiction in the
7 literature.

8 QUESTIONS BY MS. GAFFNEY:

9 Q. So when you say "there's a wide
10 range" in the literature, does that mean it's
11 your understanding that the literature does
12 not uniformly support your statement?

13 A. It supports two different data
14 points. I'm talking about no history of
15 substance abuse or mental health issues, the
16 iatrogenic issue is low.

17 There are other data that do
18 not exclude those -- there are other pieces
19 of data or data that doesn't exclude --
20 exclude those, and so the rates are higher in
21 that -- in that population.

22 Q. Okay. But just for the way
23 that you've expressed it here, which is
24 limited to the population for patients with
25 no history of substance abuse or mental

1 health issues, is it your opinion that the
2 literature existing on that question
3 uniformly supports your statement that for
4 those patients the risk of iatrogenic
5 addiction is low?

6 MR. BLANK: Objection.

7 THE WITNESS: Yes.

8 QUESTIONS BY MS. GAFFNEY:

9 Q. The wide range that exists in
10 the literature that you mentioned, what is
11 the range?

12 A. It's as, believe it or not, low
13 as less than 1 percent to as high as -- I've
14 seen in the 30s, 30 percent. Commonly said
15 between 1 and 20 -- and 20 percent.

16 Q. Keep going to page 9 of your
17 report.

18 A. Sure.

19 Q. Sorry, just give me a second.
20 The inside might be wrong.

21 Okay. Here it is at the top of
22 the page. "The current problem of opioid
23 misuse and abuse seems to be part of a much
24 larger and complex substance abuse problem
25 driven primarily by powerful socioeconomic

1 factors rather than by any specific substance
2 of abuse."

3 What do you mean by "powerful
4 socioeconomic factors"?

5 A. The rates of poverty, rates of
6 identification of socioeconomic factors, are
7 primarily poverty and, interestingly enough
8 in some instances, is wealth. In some
9 instances it turns out to be complacency
10 within the context of what's going on, and in
11 some instances it's the outcome of -- those
12 are -- those are the instances of what you're
13 talking -- what exist.

14 Q. And to understand the basis for
15 your opinion here, you have cited -- you have
16 two footnotes here citing two different
17 articles, and I take it that these are --
18 form part of the basis for your opinion here?

19 A. Yes.

20 Q. Okay. Are there any other
21 bases for this opinion?

22 A. Again, a lot of it is based
23 upon my observation, you know, in caring for
24 a lot of patients over -- you know, tens of
25 thousands of patients over 40 years.

1 Q. Okay. Keep going through your
2 report.

3 On pages 10 through 11 of your
4 report, you discuss that states were slow to
5 adopt recommended measures to curb opioid
6 abuse.

7 Is that a fair summary?

8 A. Yes.

9 Q. And that they've also gone too
10 far in some respects?

11 A. Yes.

12 Q. What are some of these
13 recommended measures to curb opioid abuse?

14 A. There have been, if not exactly
15 here, three of them that would be noted. The
16 first one was the development of something
17 called the PDMP, or Prescription Drug
18 Monitoring Program, the second one was the
19 ability to have a drug takeback, and the
20 third has been the development of these now
21 commercially available bags that you can pour
22 extra medicines in that make them unusable,
23 are three off the top of my head without
24 rereading all of my other components here.

25 Q. It's on page 11 that you say

1 that "in some cases, however, the pendulum
2 has swung back too far."

3 What do you mean by that, "the
4 pendulum has swung back too far"?

5 A. There are patients who would be
6 considered, quote, legacy patients, unquote,
7 on opioid-based pain medications, and their
8 medications are being discontinued, and the
9 outcome is a negative outcome for the
10 patient.

11 Q. What sort of negative outcome
12 for the patient?

13 A. From a reduction in functional
14 capacity and activity, increasing pain, and
15 an increasing suicide rate.

16 Q. And is the primary basis for
17 your opinions in this section your clinical
18 experience?

19 A. Clinical experience, and there
20 are some references in here as well
21 to Volkow, V-o-l-k-o-w. Yeah, New England
22 Journal of Medicine and...

23 Q. Any others that you would point
24 to as forming the basis for your opinions
25 here in this section?

1 A. There are a number -- there are
2 a number of others, I don't -- that are in
3 here that I don't want to -- I mean, they're
4 in here and I could -- I could find, but it
5 will take some time to do that.

6 The other one is -- how do you
7 pronounce that? Oquendo, O-q-u-e-n-d-o, and
8 Volkow, V-o-l-k-o-w. Passik, the two Passik
9 articles, Dowma.

10 So there are a series of
11 articles in here that support that concept.

12 Q. Okay. Thank you.

13 When did you form this opinion?

14 MR. BLANK: Objection.

15 THE WITNESS: The opinion --

16 QUESTIONS BY MS. GAFFNEY:

17 Q. Just to clarify, the opinion we
18 were just discussing with respect to these
19 measures -- the pendulum swinging back too
20 far.

21 A. In the last two years.

22 Q. Turning to the section of your
23 report on neonatal abstinence syndrome.

24 A. Yes.

25 Q. You state that "there's little,

1 if any, evidence that babies with neonatal
2 abstinence syndrome born to mothers who
3 receive prescription medications during
4 pregnancy and were medically managed by an
5 obstetrician have lingering effects or
6 disabilities, nor is there any evidence that
7 there's an increased cost of treatment."

8 What's the basis for that
9 statement?

10 A. That's directly out of a -- out
11 of an article, that's number one.

12 Number two is that the
13 manage -- when -- when women who are pregnant
14 are known to have use of opiate-based pain
15 medications for whatever reason and the
16 obstetrician is supervising that process,
17 they also then alert then the neonatal units
18 of what's happening, and so there's a --
19 there's a more intensive kind of observation
20 of that process.

21 Often those mothers deliver on
22 due dates at the expected date of
23 confinement, and there are less premature
24 births. And so that's the basis of really
25 what goes on.

1 Q. Okay. So in large part coming
2 from your clinical experience?

3 A. Correct.

4 Q. Okay. And you mentioned an
5 article.

6 What article is that?

7 A. Well, hopefully I included it
8 here.

9 Okay. I don't see -- oh, here
10 it is. One of them is "Opioid Use Disorder
11 and Rise in Pregnant Women, Practical Pain."

12 That was one of the articles.

13 Q. Are there any others on your
14 materials considered list?

15 A. Not that I noted.

16 Q. Do you consider yourself
17 familiar with the literature with respect to
18 changes in the neonatal brain following
19 prenatal opioid exposure?

20 A. I'm not familiar with that
21 literature.

22 Q. You state that there isn't any
23 evidence that there's an increased cost of
24 treatment for these babies with neonatal
25 abstinence syndrome whose mother has been

1 managed by an obstetrician, but you also
2 state that the infants are immediately
3 entered into the NICU.

4 Would you agree that NICU care
5 comes with an increased cost compared to care
6 outside of the NICU?

7 A. It probably does, uh-huh, yes.

8 Q. Well, would you agree that NICU
9 care -- does it bring any risk, increased
10 risk, such as risk of infection?

11 A. I don't know that literature.
12 I can't comment on that.

13 Q. What's the basis for your
14 statement that women actively using illicit
15 drugs, that many of them have more than one
16 unexpected pregnancy?

17 A. More than one unexpected
18 pregnancy?

19 Actually, it's women who are
20 using illicit and polysubstance abuses, they
21 tend to have unintentional pregnancies.

22 Q. I'm just looking at the -- at a
23 line here. It says, "Without the needed
24 ongoing recovery support through counseling
25 and medication-assisted treatment, many of

1 these women have more than one unexpected
2 pregnancy."

3 A. Yes, that also is true.

4 What happens is they do not
5 achieve effective protection against
6 pregnancy.

7 Q. And what's the basis for that
8 statement?

9 A. Both some clinical observation
10 as well as reading literature and discussions
11 within the context of some of the different
12 hospital committees that I am a part of.

13 Q. The literature that you
14 mentioned, is it on the materials considered
15 list?

16 A. I'm not -- I don't think that
17 is.

18 Q. And the following sentence,
19 "Most, if not all, of these children become
20 wards of the state, being raised either by
21 grandparents or foster parents," what's the
22 basis for that statement?

23 A. The outcomes of the children
24 that I've seen who are -- whose mothers are
25 actively using and the outcomes of what I see

1 in practice currently. The number of
2 children that are being raised by their
3 grandparents is profound.

4 Q. Okay. So your clinical
5 practice is the basis for that?

6 A. Yes.

7 Q. Okay. Dr. Hevern, would you
8 say that you have been personally affected by
9 the opioid crisis?

10 A. What do you mean?

11 Q. Do you feel that the opioid
12 crisis has affected you personally in any
13 way?

14 A. I have not personally been
15 affected by it.

16 Q. Has it affected you
17 professionally?

18 MR. BLANK: Objection.

19 THE WITNESS: Yes.

20 QUESTIONS BY MS. GAFFNEY:

21 Q. How so?

22 A. A lot more work.

23 Q. The type of work you're
24 referring to, is it the work you do treating
25 patients with addiction or --

1 A. Correct.

2 Q. Outside of your work with
3 Dechert in this case, have you ever worked
4 with any of the other law firms involved in
5 this litigation?

6 I can run through the list
7 if --

8 A. You don't have to run through
9 the list. The answer is no.

10 Q. Are you familiar with any of
11 the experts working with the plaintiffs in
12 this litigation?

13 A. What do you mean?

14 Q. Do you know any of them
15 professionally or personally?

16 A. No.

17 Q. Same question for any of the
18 other defense experts?

19 A. I've never met them.

20 Q. Do you communicate with any of
21 the other experts offering reports on behalf
22 of the defense in this litigation?

23 A. No, I have not.

24 MS. GAFFNEY: We can take a
25 short break.

1 VIDEOGRAPHER: We're going off
2 the record at 2:10 p.m.

3 (Off the record at 2:10 p.m.)

4 VIDEOGRAPHER: We're back on
5 the record at 2:21 p.m.

6 MS. GAFFNEY: Dr. Hevern, I
7 don't have any further questions. I
8 understand your counsel --

9 MR. BLANK: Thank you, Counsel.
10 So I will have just one or two
11 questions. So I'm going to move over
12 to the other side of the table so you
13 continue to look in the right
14 direction. Give me a moment.

15 VIDEOGRAPHER: Do you want to
16 go off the record?

17 CROSS-EXAMINATION

18 QUESTIONS BY MR. BLANK:

19 Q. Dr. Hevern, just two follow-up
20 areas of questions.

21 Earlier today Ms. Gaffney asked
22 you about the fees that you received for
23 various speaker engagements over your career;
24 is that right?

25 A. That's correct.

1 Q. I believe you said something in
2 the range of \$10,000?

3 A. Yes, correct.

4 Q. Was that a total amount over a
5 period of time?

6 A. It's probably total amount over
7 the 20 years that I've spoken.

8 Q. Okay. And so for a typical
9 engagement, what are the fees for just a
10 one-time -- sorry, a single engagement?

11 A. From \$350 to \$1,500.

12 Q. And earlier today Ms. Gaffney
13 also asked you a number of questions about
14 presentations that you've made and speaker
15 bureau practices.

16 Do you recall that?

17 A. Yes.

18 Q. And I believe that one of the
19 presentations you said you made was on
20 Butrans.

21 Do you recall that?

22 A. Yes.

23 Q. And was that in a speaker
24 bureau format?

25 A. That was a speaker bureau

1 format, correct.

2 MR. BLANK: Okay. I don't have
3 anything further.

4 MS. GAFFNEY: No further
5 questions.

6 MR. BLANK: We're off the
7 record.

8 VIDEOGRAPHER: Okay. This
9 concludes the videotaped deposition of
10 Gerard Hevern, MD.

11 We are going off the record at
12 2:23 p.m.

13 (Deposition concluded at 2:23 p.m.)

CERTIFICATE

I, CARRIE A. CAMPBELL, Registered
Diplomate Reporter, Certified Realtime
Reporter and Certified Shorthand Reporter, do
hereby certify that prior to the commencement
of the examination, Gerard Hevern, MD, was
duly sworn by me to testify to the truth, the
whole truth and nothing but the truth.

I DO FURTHER CERTIFY that the
foregoing is a verbatim transcript of the
testimony as taken stenographically by and
before me at the time, place and on the date
hereinbefore set forth, to the best of my
ability.

I DO FURTHER CERTIFY that I am
neither a relative nor employee nor attorney
nor counsel of any of the parties to this
action, and that I am neither a relative nor
employee of such attorney or counsel, and
that I am not financially interested in the
action.

CARRIE A. CAMPBELL,
NCRA Registered Diplomate Reporter
Certified Realtime Reporter
Notary Public
Dated: June 14, 2019

1 INSTRUCTIONS TO WITNESS

2
3 Please read your deposition over
4 carefully and make any necessary corrections.
5 You should state the reason in the
6 appropriate space on the errata sheet for any
7 corrections that are made.

8 After doing so, please sign the
9 errata sheet and date it. You are signing
10 same subject to the changes you have noted on
11 the errata sheet, which will be attached to
12 your deposition.

13 It is imperative that you return
14 the original errata sheet to the deposing
15 attorney within thirty (30) days of receipt
16 of the deposition transcript by you. If you
17 fail to do so, the deposition transcript may
18 be deemed to be accurate and may be used in
19 court.

ACKNOWLEDGMENT OF DEPONENT

I, _____, do
hereby certify that I have read the foregoing
pages and that the same is a correct
transcription of the answers given by me to
the questions therein propounded, except for
the corrections or changes in form or
substance, if any, noted in the attached
Errata Sheet.

Gerard Hevern, M.D.

DATE

Subscribed and sworn to before me this
_____ day of _____, 20 ____.

My commission expires: _____
